Adjourn
City of Leawood
Board of Zoning Appeals Staff Report

MEETING DATE: 06-26-2013
REPORT WRITTEN: 06-20-2013

Case 24-2013  3651 College Boulevard – Request for variance to the required rear yard setback in accordance with the LDO, Section 16-2-6.1(D) in an SD-O District.

APPLICANT:
- Samuel Beckman/ACI Boland Architects.
- Kansas City Orthopaedic Institute MOB/Owners.

REQUESTED ACTION:
- The applicants wish to construct an enclosure around a generator for sound reduction. The enclosure would be placed 28 feet from the rear property line resulting in a 12 foot encroachment.

EXISTING ZONING:
- The property is zoned SD-O with a 40 foot rear yard setback.

SITE PLAN:
- The property was developed in 1998 on a large 4 plus acre lot. It is home to the Kansas City Orthopaedic Institute and is required to have a generator. The noise produced by the generator exceeds the maximum limit allowed per the LDO.
- The residential area was developed in 2003 and noise complaints started due to the required testing periods of the generator.
- The site has ample vegetation that separates the residential properties but due to the placement of the generator the sound is being reflected off the back of the structure and directed toward the residential neighborhood.

ANALYSIS:
- Staff has reviewed the application for variance to the rear yard setback in light of the five criteria outlined in KSA 12-759 and LDO 16-5-4.3 and offer the following comments:
  a. **Uniqueness of Property:** Other than the structure being a Licensed Hospital there is nothing that makes the property unique.
  b. **Rights of Adjacent Property Owners:** While several complaints have been made over the years due to the noise; no calls, complaints or emails have been received due to the variance request.
  c. **Hardship:** If the LDO is enforced the structure would have to meet the required 40 foot setback.
  d. **Public Safety and General Welfare:** Approval or denial of the request should not affect the public safety or general welfare.
e. **Spirit and Intent:** The spirit and intent of the ordinance is to maintain a safe and aesthetically pleasing distance between commercial and residential structures. Approval of the request would place the structures 12 feet closer but could deflect the noise from the generator.

**STAF COMMENTS:**
- If the request is approved the plan will still have to go before the Planning Commission and Governing Body for an amended site plan and final approval.
APPLICATION FOR
BOARD OF ZONING APPEALS
REQUEST FOR VARIANCE

Please read the application fully before completing. This application cannot be processed unless complete with all the required documents attached. If you need any assistance in completing the form, please call the Planning and Development Department at (913) 339-6700 x 160. Fax: (913) 339-8736.
