ARTICLE 4. DISTRICTS AND BOUNDARIES.

15-401 Zoning Districts.
In order to regulate and restrict the use of land and the erection, construction, reconstruction, alteration, moving or use of buildings, structures or land, the corporate area of Leawood, Kansas, is divided into thirteen zoning districts as follows:
15-402 Planned Zoning Districts.

Planned zoning procedures are hereby incorporated in this title as provided in K.S.A. 12-725 to 12-735. Except in the case of standard single family subdivisions, which may be zoned to District R-I, or when land is to be zoned District A, Agriculture District, all rezoning of land within the City of Leawood shall hereafter follow planned zoning procedures as set out in this Article and Article 31 of this Ordinance.

All land that is zoned to a planned zoning district on the Zoning District Map adopted herewith and for which no development plans have been submitted, shall require the submittal of preliminary and final development plans for any new construction, reconstruction and alteration of any building, structure or parking area. Such preliminary and final plans shall conform to the conditions of this Article and the procedures set out in Article 31 for the rezoning of land, including public hearing thereon.

15-403 Statement of Objectives.

The zoning of land in Leawood to one of the planned districts (RP-1 to MP-1 inclusive) shall be for the purpose of encouraging and requiring orderly development on a quality level generally equal to or exceeding that which prevails in the City of Leawood, but permitting deviations from normal and established development techniques. The use of planned zoning procedures is intended to encourage large scale development tracts, efficient development of small tracts, innovative and imaginative site planning, conservation of natural resources and minimum waste of land. The following are specific objectives of this section:

A. A proposal to rezone land to a planned district shall be subject to the same criteria relative to compliance with the City of Leawood's master plans, land use policies, neighborhood compatibility, adequacy of streets and utilities and other elements, as is normal in this City's rezoning deliberations.

B. The submittal by the developer and the approval by the City of development plans represents a firm commitment by the developer that development will indeed follow the approved plans in such areas as concept, intensity of use, aesthetic levels and quantities of open space.
C. Deviations in yard requirements, setbacks and relationship between buildings as set out in Standards of Development in Section 4 of this article, may be approved by the Plan Commission and Council if it is deemed that other amenities or conditions will be gained to the extent that an equal or higher quality of development will be produced.

D. Residential areas are to be planned and developed in a manner that will produce more useable open space, better recreational opportunities, safer and more attractive neighborhoods than under standard zoning and development techniques.

E. Commercial areas are to be planned and developed so as to result in attractive, viable and safe centers and clusters as opposed to strip patterns along thoroughfares. Control of vehicular access, and circulation, architectural quality, landscaping and signs will be exercised to soften the impact on nearby residential neighborhoods, and to assure minimum adverse effects on the street system and other services of the community.

F. The developer will be given latitude in using innovative techniques in the development of land not feasible under application of standard zoning requirements.

G. Planned zoning shall not be used as a refuge from the standard requirements of the zoning district as to intensity of land use, amount of open space or other established development criteria.

H. Any building or portion thereof may be owned in condominium under K.S.A. 53-3101.

I. For purposes of this title the terms "shopping center," "business park," "office park," "industrial park," or other grouping of buildings shall mean developments that were planned as an integrated unit or cluster on property under unified control or ownership at the time the zoning was approved by the City. The sale, subdivision or other partition of the site after zoning approval does not exempt the project or any portion thereof from complying with development standards, architectural quality, sign concepts and other conditions that were committed at the time of rezoning.

J. All utilities shall be underground except that those power and telephone lines which, for engineering reasons, cannot reasonably or safely be placed underground may, upon written approval of the City Engineer, be constructed overhead.
15-404 Local Administrative Agency.
The agency having the authority to administer the planned zoning procedure and implementation of projects in connection therewith shall be the Plan Commission together with the municipal staff assigned to assist said Commission.

15-405 Standards of Development.
A. The maximum height of buildings and structures shall be as set out in the standard requirements of the applicable district.

B. The intensity of land use, the bulk of buildings, the concentration of population, the amount of open space, light and air shall be generally equal to that required in the standard requirements of the applicable district.

C. The density of residential dwelling units, the parking requirements and the performance standards shall be the same as in the standard requirements of the appropriate district.

D. The permitted uses shall be the same as those permitted in the standard requirements of the appropriate district, provided that limitations may be placed on the occupancy of certain premises, if such limitation is deemed essential to the health, safety or general welfare of the community.

E. The Plan Commission may require assurance of the financial and administrative ability of any agency created by a developer for the purpose of maintaining common open space and facilities of a nonpublic nature.

F. The Plan Commission and City Council may, in the process of approving preliminary and final plans, approve deviations from the standard requirements as follows, provided any deviation so approved shall be in keeping with accepted land planning principles and must be clearly set out in the minutes as well as on exhibits in the record:

(1) Setbacks of buildings and paved areas from a public street may be reduced to seventy-five percent of the standard requirement.

(2) Setbacks of buildings from a property line other than a public street may be reduced to eighty-five percent of the standard requirement and setbacks of paved areas adjacent to property lines, other than street lines, to zero if existing or proposed development on said adjacent land justifies the same.

(3) Side yards between buildings may be reduced to zero.

(4) Setbacks of buildings and paved areas from a freeway right-of-way may be reduced to five feet.
A portion of the parking area required under this title may remain unimproved until such time as the City Council deems it must be improved to serve parking demand adequately. The foregoing deviations 1 thru 4 may be granted by the Plan Commission and City Council only when compensating open space is provided elsewhere in the project, where there is ample evidence that said deviation will not adversely affect neighboring property, nor will it constitute the mere granting of a privilege.

G. The parking ratio for grouped commercial projects shall as a minimum follow the standard requirements. However, approval of a preliminary rezoning plan does not exempt the ultimate tenant from following any higher requirement contained within Article 24, Additional Parking Standards.

H. The design of all planned projects, whether residential, commercial or industrial shall be such that access and circulation by fire fighting equipment is assured and not retarded by steep grades, heavy landscaping or building spacing.

**15-406 Procedures.**

A. The procedure for zoning land to a planned district shall be as set out in Article 31 of this ordinance.

B. Conformance to master plan. In the consideration of a change to a planned zoning district the Plan Commission and Governing Body shall determine whether the proposal conforms to master plans, special studies and policies normally utilized in making zoning decisions in Leawood, Kansas.

C. Recording of approval. After rezoning to a planned district has been approved there shall be filed with the Register of Deeds a statement that a plan for the area has been approved. The statement shall specify the nature of the plan, the proposed density or intensity of land uses and other pertinent information sufficient to notify any prospective purchasers or users of land of the existence of such a plan. The landowner shall submit this statement to the City with the appropriate recording fee. The City shall be responsible for recording the statement.

D. The developer shall submit to the City on positive film a reduced copy of the final approved site plan.

**15-407 City Zoning District Maps.**

Zoning district maps, in accordance with K.S.A. 12-707, are hereby established and shall be maintained by the Planning and Development Department. The maps shall be changed immediately after a zoning district is added or changed by ordinance wherein the zoning maps shall accurately describe these districts.

**15-408 General Requirements.**

All requirements must be observed, except as hereafter provided:

A. Subsequent to the passage of this ordinance no building shall be erected, converted, enlarged, reconstructed or structurally altered, nor shall any building or land be used except in conformity with the regulations for the district in which the premises are located, except pursuant to the provisions of Article 19, Special Uses and Article 21, Non-Conforming Uses.

C. No person, firm or corporation, nor any employee or agent of such person, firm or corporation, shall undertake the work of installing, altering or furnishing any utility services in any dwelling, commercial building or industrial structure, without first requiring the property owner to exhibit a valid building permit issued by the City of Leawood, Kansas authorizing such owner to make such improvements or alterations.

D. The land area which may hereafter become a part of the corporate area of the City of Leawood, Kansas by annexation shall retain the zoning placed on the property by the Township Zoning Board until the City of Leawood, by due process, including public hearing, zones such land under provisions of this ordinance.

   e. The development involves an area of land of not less than twenty (20) acres and in a location that harsh relationship between contrasting land uses will not degrade property values. The Planning Commission may designate sections within the district that are considered appropriate for warehousing-distribution development and others where residential and similar uses should be grouped.
f. The high noise levels produced by highway traffic are recognized and accounted for in the planning of the project.  

15-17A03 Height and Area Regulations.  
In District SP the height of buildings and structures and the amount of open space shall generally be equivalent to the most comparable standard zoning district. Setbacks of buildings, structures and paved areas from such streets as State Line Road and Highway 150 shall be sufficient to insulate the use from highway noise and commotion and provide greater than normal open space of a thoroughly landscaped and highly maintained character.  

15-17A04 Parking Regulations.  
In District SP the amount of parking and loading facilities shall be determined by the proposed uses of the property and shall be subject to approval by the Plan Commission in the rezoning and final plan approval process.

ARTICLE 18. FLOOD PLAIN DISTRICT

The Legislature of the State of Kansas has in K.S.A. 1973 Supp. 12-704 et seq delegated the responsibility to local governmental units to adopt zoning regulations designed to protect flood prone areas in compliance with the Federal Flood Disaster Protection Act of 1973, and as is from time to time amended.

15-1802 Incorporation by Reference.  
There is hereby incorporated by reference the following maps or studies prepared in connection with the program, and available for review in the office of the City Clerk.
A. The Flood Insurance Rate Map (FIRM), Flood Hazard Boundary Map;  
B. Vicinity Map;  
C. Flood Profiles;  
D. Flood Boundary and Floodway Map;  
E. Flood Insurance Study;  
F. Actuarial Rates;  
G. Flood Plain Zoning Map;  
H. Definitions.

15-1803 General Provisions.  
A. Lands to which Ordinance Applies. This ordinance shall apply to all lands within the jurisdiction of the City of Leawood, Kansas identified on the City's Flood Plain Zoning Map as numbered and unnumbered A Zones and within the Zoning Districts FW and FF established in Article 5 of this ordinance. In all areas covered by this ordinance no development shall be permitted except on receipt of a permit to develop granted by the City Council or its duly designated representative under such safeguards and restrictions as the Council or the designated representative may reasonably impose for the promotion and maintenance of the general welfare and health of the inhabitants of the City.
B. Enforcement Officer. The Chief Building Official of the City is hereby designated as the Council's duly designated Enforcement Officer under this ordinance.

C. Rules for Interpretation of District Boundaries. The boundaries of the floodway and floodway fringe overlay districts shall be determined by scaling distances on the Flood Plain Zoning Map. Where interpretation is needed to the exact location of the boundaries of the districts as shown on the Flood Plain Zoning Map, as for example where there appears to be a conflict between a mapped boundary and actual field conditions, the Chief Building Official shall make the necessary interpretation. In such cases where the interpretation is contested, the Board of Zoning Appeals will resolve the dispute. The regulatory flood protection elevation for the point in question shall be the governing factor in locating the district boundary on the land. The person contesting the location of the district boundary shall be given a reasonable opportunity to present his case to the Board and to submit his own technical evidence, if he so desires.

D. Compliance. No structure, land or water shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this ordinance and other applicable regulations.

E. Abrogation and Greater Restrictions. It is not intended by this ordinance to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this ordinance imposes greater restrictions, the provision of this ordinance shall prevail.

F. Warning and Disclaimer of Liability. The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study, larger floods may occur on rare occasions or the flood height may be increased by man made or natural causes, such as ice jams and bridge openings restricted by debris. This ordinance does not imply that areas outside floodway and floodway fringe district boundaries or land uses permitted within such districts will be free from flooding or flood damages. This ordinance shall not create liability on the part of the City of Leawood, Kansas or any officer or employee thereof for any flood damages that may result from reliance on this ordinance or any administrative decision lawfully made thereunder.

15-1804 Development Permit.

A. Permit Required. No person, firm or corporation shall initiate any development or construction within the area regulated by this ordinance or cause the same to be done without first obtaining a permit therefor on the forms provided by the City. Any plans for development or construction to be located in the Flood Plain shall require the following additional documentation.

1. Within designated flood prone areas, the plans for development must be accompanied by elevations (in relation to mean sea level) of the lowest habitable floor (including basement) or in the case of flood proofed nonresidential structures,
the elevation to which it has been floodproofed. Documentation or certification of such elevations will be maintained by the Chief Building Official.

2. Give such other information as reasonably may be required by the Chief Building Official.

(a) A typical valley cross-section showing the channel of the stream, elevation of land areas adjoining each side of the channel, cross-sectional areas to be corrupted by the proposed development and higher water information.

(b) Plan (surface view) showing elevations or contours of the ground; pertinent structure, fill or storage elevations; size, location and spatial arrangement of all proposed and existing structures on the site; location and elevations of streets, water supply, sanitary facilities, photographs showing existing land uses and vegetation upstream and downstream, soil types, and other pertinent information.

(c) Profile showing the slope of the bottom of the channel or flow line of the stream.

B. The chief Building Official shall review all building permit applications to determine if the site of the proposed development is reasonably safe from flooding and that all necessary permits have been received as required by Federal or State law (including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S. Code 1334) and make recommendations for development in all locations which have flood hazards.

15-1805 Establishment of Zoning Districts.

The mapped flood plain areas within the jurisdiction of this ordinance are hereby divided into the two following districts: A floodway overlay district (FW) and a floodway fringe overlay district (FF) identified in the Flood Insurance Study (Flood Boundary and Floodway Map(s)). The boundaries of these districts shall be shown on the Flood Plain Zoning Map. Within these districts all uses not meeting the standards of this ordinance and those standards of the underlying zoning district shall be prohibited.

15-1806 Standards for The Floodway Overlay District and The Floodway Fringe Overlay District Within The Entire Flood Plain.

A. No permit for development shall be granted for new construction, substantial improvements and other improvements within A Zones unless the conditions of this Section are satisfied.

B. All areas identified as unnumbered A Zones on the FIRM are subject to inundation of the one hundred year flood; however, the water surface elevation was not provided. The unnumbered A Zones shall be subject to all development provisions of this ordinance except those sections relating to elevations or floodproofing. If Flood Insurance Study data is not available the City shall utilize any base flood elevation data currently available within its area of jurisdiction.

C. New construction, substantial improvements, prefabricated buildings and other developments shall be designed or anchored to prevent the flotation, collapse or lateral movement due to flooding and will require:
1. New or replacement water supply systems and/or sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on site waste disposal systems shall be located so as to avoid impairment of them or contamination from beyond applicable environmental control limits during flooding.

2. Subdivision proposals and other proposed new development shall be required to assure that (a) all such proposals are consistent with the need to minimize flood damage; (b) all public utilities and facilities, such as sewer, gas, electrical, and water systems are located, elevated and constructed to minimize or eliminate flood damage; (c) adequate drainage is provided so as to reduce exposure to flood hazards; and (d) proposals for development of five (5) acres or fifty (50) lots whichever is lesser, include within such proposals the regulatory flood protection elevation.

3. Substantial improvements shall: (a) use construction materials and utility equipment that are resistant to flood damage; and (b) use construction methods and practices that will minimize flood damage, consistent with economic practicability.

4. Utility and Sanitary Facilities - All utility and sanitary facilities shall be flood proofed up to the regulatory flood protection elevation so that any space below the regulatory flood protection elevation is water tight with walls substantially impermeable to the passage of water with structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy.

5. Provide that until a floodway has been designated, no development, including landfill, may be permitted within Zones AI-30 on the City's FIRM unless the applicant for the land use has demonstrated that the proposed use, when combined with all other existing and reasonably anticipated uses, will not increase the water surface elevation of the 100-year flood more than one (1) foot on the average cross-section of the reach in which the development or landfill is located as shown on the Flood Insurance Study incorporated by reference; Section 2 of this Article.

6. The use of construction materials and utility equipment that are resistant to flood damage; moreover, construction methods and practices will minimize flood damage.

7. The Governing Body of the City to insure that the flood carrying capacity within the altered or relocated portion of any watercourse is maintained. The City will notify, in riverine situations, adjacent communities and the State Coordinating Office prior to any alteration or relocation of a watercourse, and submit copies of such notifications to the Administrator. Moreover, the City will work with appropriate State and Federal agencies in every way possible in complying with the National Flood Insurance Program in accordance with the National Flood Disaster Protection Act of 1973.
8. Storage of material and equipment: (a) The storage or processing of materials that are in time of flooding buoyant, flammable, explosive, or could be injurious to human, animal or plant life is prohibited. (b) Storage of other material or equipment may be allowed if not subject to major damage by floods and firmly anchored to prevent flotation or if readily removable from the area within the time available after flood warning.

15-1807 Floodway Overlay District.

A. Permitted Uses. Only uses having a low flood-damage potential and not obstructing flood flows shall be permitted within the Floodway District to the extent that they are not prohibited by other ordinance and provided they do not require structures, fill, or storage of materials or equipment. No use shall increase the flood protection elevation. These uses are subject to the standards of Section 1806 of this Article.

1. Agricultural uses such as general farming, pasture, nurseries, forestry.
2. Residential uses such as lawns, gardens, parking and play areas.
3. Nonresidential areas such as loading areas, parking, airport landing strips.
4. Public and private recreational uses such as golf courses, archery ranges, picnic grounds, parks, wildlife and nature preserves.

15-1808 Floodway Fringe Overlay District.

A. Permitted Uses. Any use permitted in Section 7 above shall be permitted in the Floodway Fringe Overlay District. No use shall be permitted in the district unless the standards of Section 1806 of this Article are met.

B. Standards for the Floodway Fringe Overlay District.

1. Require new construction or substantial improvements of residential structures to have the lowest floor, including basement, elevated to or above the regulatory flood protection elevation.
2. Require new construction or substantial improvements of nonresidential structures to have the lowest floor, including basement, elevated to or above the regulatory flood protection elevation or, together with attendant utility and sanitary facilities, to be floodproofed up to that level.
3. Within Zones A0 all new construction improvements of residential structures have the lowest floor, including basement, elevated above the crown of the nearest street to or above the depth number specified on the official FIRM. Nonresidential structures, within Zones A0, together with attendant utility and sanitary facilities may be floodproofed to or above the depth number specified on the official FIRM.

15-1809 Certification and Information.

A. Flood Proofing. Applicants shall provide certification by a registered professional engineer or architect that the flood proofing plans are adequate to be water tight with walls impermeable to the passage of water and withstand the hydrostatic and hydrodynamic forces associated with the one hundred year flood.
B. **Flood Proofing of Residential Structures** will not be allowed unless the City is specifically granted an exception from the provisions of this ordinance by the Administrator of the Federal Insurance Administration.

C. **Elevation of Property.** The applicant shall provide information identifying the elevation of the property in relation to mean sea level of the lowest flood (including the basement of the proposed structure) to which structures are flood proofed. In addition, the applicant shall provide this information for the second lowest floor if below grade on one of or more sides.

D. The **Chief Building Official** will maintain the records of certification when issuing development permits in conformance with this section.

15-1810 **Variance.**

A. Where by reason of exceptional narrowness, shallowness, shape of topography, or other extraordinary or exceptional situation or condition of a specific piece of property, the strict application of any provision of this article would result in peculiar and exceptional hardship upon the owner of the property as an unreasonable deprivation of use as distinguished from the mere grant of a privilege, the Board of Zoning Appeals may authorize a variance from strict application so as to relieve the demonstrable difficulties or hardships, provided that such a variance may be granted only if:

1. The structure is to be erected on a lot of one half acre or less in size and such lot is contiguous to and surrounded by lots with existing structures constructed below the regulatory flood protection elevation.
2. The structure is listed on the National Register of Historic Places, or the State Inventory of Historic Places to be restored or reconstructed.

B. Variances shall not be issued except upon (1) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the variance issuance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public, or conflict with existing local or state laws or ordinances.

C. Variances may only be issued upon a determination that the applicant requesting a variance shall meet the minimum necessary standards of this ordinance to afford relief.

D. The city shall notify the applicant that the issuance of a variance to locate a structure at an elevation below the one hundred year flood level will result in increased actuarial rates for flood insurance coverage.
15-1811 Non-Conforming Use.

A. A structure or the use of a structure or premises which was lawful before the passage or amendment of the ordinance but which is not in conformity with the provisions of this ordinance may be continued subject to the following conditions:
   1. No such use or substantial improvement of that use shall be expanded, changed, enlarged, or altered in a way which increases its non-conformity.
   2. For the purposes of this ordinance if such use is discontinued for 12 consecutive months, any future use of the building premises shall conform to this ordinance.
   3. Uses or adjuncts thereof which are or become nuisances shall not be entitled to continue as non-conforming uses.

B. If any non-conforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty percent of the market value of the structure before the damage occurred except that it may be reconstructed in conformity with the provisions of this ordinance. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building, or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

ARTICLE 19. SPECIAL USES

ARTICLE 23. ADDITIONAL HEIGHT AND AREA REGULATIONS

15-2301 Supplements to Heights Regulations.

The regulations hereinafter set forth in this article qualify or supplement, as the case may be, the district regulations appearing elsewhere in this Ordinance.

A. Public, semi-public or public service buildings, hospitals, institutions, or schools, when permitted in a district, may be erected to a height not exceeding seventy-five feet, and places of worship may be erected to a height not exceeding ninety feet, if the building, or the portion thereof exceeding the height limit, of the applicable district, is set back from each minimum yard line at least one foot for each foot of additional building height above the height limit otherwise provided in the district in which the building is built; provided, however, that such exceptions shall not be permitted within three thousand feet of any airport or landing field.
B. Except as provided elsewhere in this Ordinance, chimneys, cooling towers, elevators, bulkheads, fire towers, monuments, stacks, stage towers, scenery lofts, tanks, ornamental towers and spires, church steeples, silos, farm buildings, or necessary mechanical appurtenances, may be erected to any lawful and safe height.

C. No building or structure or any portion thereof shall be erected within the approach zone of any existing runway or landing strip in excess of a height above the elevation at the end of said runway, equal to one-fortieth of the horizontal distance from the end of said runway measured along the centerline of said runway extended. The approach zone is considered to be a trapezoidal area extending from the end of, and in the same direction as said runway for a distance of two miles. Such area is, in the case of an instrument runway, one thousand feet wide at the end of the runway and four thousand feet wide two miles from the end of the runway, and in the case of a noninstrument runway, five hundred feet wide at the end of the runway and twenty-five hundred feet wide two miles from the end of the runway.

Further, no building or structure or any portion thereof shall be erected in the transition zones on either side of an approach zone of any existing runway or landing strip in excess of a height above the elevation at the end of said runway, computed as follows: one-fortieth of the horizontal distance from the end of said runway measured along the centerline of said runway extended, plus one-seventh of the horizontal distance at the near edge of the approach zone, measured perpendicular to the centerline of said runway extended. For the purpose of computing glide angles for the zoning of approaches to any airport in Leawood, Kansas, in all cases where an airport is bounded by a public road the effective length of the runways directed over any such public road shall be computed (using a slope of forty feet horizontal to one foot vertical) to produce a height of fourteen feet at the right-of-way line of such road nearest to the airport.

D. Open or lattice-enclosed fire escapes, fireproof outside stairways, and balconies opening upon fire towers projecting into a rear yard not more than five feet, and the ordinary projection of chimneys and flues are permitted.

E. An open unenclosed porch may project into a required rear yard for a distance not exceeding ten feet.

F. In residential districts, where existing residential buildings within a block and on the same side of a street, have front yards which vary more than fifteen feet, or which front yards exceed the minimum regulations of this ordinance, any construction of new, or additions to existing, buildings shall provide a front yard equal to the average of the front yard provided by the nearest buildings on both sides. In cases where such average yard is not equitable or practical in the opinion of the owner or the City Architect, the Board of Zoning Appeals shall determine the amount of front yard to be provided.
G. All corner lots shall provide sight distance triangles, the short leg of which shall be twenty feet, and the long leg of which shall be one hundred forty feet measured along the curb line or edge of the pavement. Such area shall be and remain free of shrubbery, fences or other obstruction to vision more than two feet in height measured from the roadway.

H. A through lot having one end abutting a limited access highway, with no access permitted to that lot from said highway, shall be deemed to front upon the street which gives access to that lot.

I. Accessibility to the rear portion of all lots in a District C-0 to M-1 inclusive for four-wheeled vehicles from and to a public street, alley or way shall be provided.

ARTICLE 24. ADDITIONAL PARKING REGULATIONS

15-2401 General Parking Regulations.
For all buildings or structures hereafter erected, constructed, reconstructed, or altered, off-street parking in the form of garages or areas made available exclusively for that purpose shall be provided. Except for the uses listed below, parking spaces shall be provided as set out in Sections 5 through 17 of this Zoning Ordinance. 15-2403 Improvement of Parking Areas.

All parking areas shall be ready for use upon occupying a building and shall be surfaced with not less than six inches of rolled stone base and three inches of hot mix asphaltic wearing surface or equivalent strength full thickness hot mix asphalt or portland cement concrete prior to the issuance of an occupancy permit, unless special permission is granted by the City Architect, due to weather conditions not being satisfactory for placing materials. Ingress and egress shall be by means of paved driveways not exceeding thirty-five feet in width. Head-in parking from any public right-of-way shall not be permitted.

Any lights used to illuminate the parking area shall be so arranged as to direct light away from any adjacent premises in a residential district and shall be of a design that the source of illumination shall not be visible from off the premises. In addition the following regulations shall apply:

A. In Districts R-1 to RP-6 inclusive, no parking shall be permitted in the required front yard or within thirty feet of a public street, except that parking of motor passenger cars shall be permitted in customary driveways of single and two family dwellings.

B. All parking lots and drives leading thereto, except those serving single-family and two-family dwellings, shall have curbs and drainage facilities approved by the City Engineer. Where greater setback requirements do not prevail, the back of the curb of a paved parking area shall not be closer than six feet to a property line, except that in a planned zoning district, the Plan Commission may permit a lesser setback where similar development on an adjoining lot will produce a satisfactory relationship.

C. No signs shall be permitted except these necessary for the orderly parking thereon, and not more than one sign with maximum area of ten square feet at each entrance to identify such parking area and present any regulations governing same.

D. The Plan Commission may require that a parking area be screened on any side where it may adversely affect adjacent property, by a wall, screen planting or fence of a height that the Commission deems adequate.
E. A portion of the parking area required under this ordinance may remain unimproved until such time as the City Council deems it must be improved to serve the parking demand adequately. Such delay in improvements shall be permitted only after the Commission is satisfied that the initial occupancy of the premises will be adequately served by the lesser number of spaces and only after approval of a final development plan indicating clearly the location, pattern and circulation to and from the delayed parking spaces. The land area so delineated for future parking shall be brought to finished grade, be landscaped, and shall not be used for building, storage, loading or other purposes.

ARTICLE 25. SIGNS

15-2501 Signs may be permitted in Zoning Districts as follows:

   See chapter 10, article 7, section 10-701 to 10-703 of the Revised Ordinance of the City of Leawood.

B. District CP-O, Planned Office Building District
   Not more than two nonilluminated, indirectly illuminated or semi-illuminated wall signs shall be permitted on each office building, provided such signs shall indicate only the name of the building or establishments housed therein. No such sign shall have an overall area exceeding five percent of the area of the wall or facade upon which it is located. In lieu of one of the wall signs permitted above, one detached sign per building may be permitted in a District CP-O. Such detached sign shall not exceed one hundred fifty square feet in area per face, may be indirectly illuminated and shall be designed in harmony with the building. The materials, designs, dimensions and location on the site shall be approved as part of the final development plan for the project.

C. District CP-I Restricted Business District.
   Each business or commercial establishment shall be permitted not more than two non-illuminated, semi-illuminated or indirectly illuminated wall signs provided the area of each sign shall not exceed five percent of the total area of the facade upon which it is placed. In addition, one non-illuminated wall sign, not more than nine square feet in area, may be placed at each major entrance to the building. Such signs shall not extend above the height of the wall upon which they are mounted.

D. District CP-2 General Business District.
   1. Each business or commercial establishment shall be permitted not more than three indirectly illuminated or non-illuminated wall or marquee signs, not more than one on a facade, the total area of which sign shall not exceed ten percent of the total area of the facade upon which it is placed. Such signs shall not extend above the average roof level of one-story building more than five feet, and shall not extend above the average roof level of two or more story buildings.

   2. Where a shopping center, business park, office park or industrial park has been zoned as a unified and integrated project, only one detached sign for the entire project, center or park shall be permitted.
E. **District MP-1, Industrial Park District.**

Industrial establishments having one or more permanent buildings may provide not more than two indirectly illuminated signs, including projecting, marquee, detached or roof types, in any location on the premises or on the building, providing such signs shall not exceed height or yard requirements as set out herein for buildings in that district, not to exceed 10% of the area of the facade.

15-2502 Additional Regulations.

A. One indirectly illuminated, or non-illuminated sign displaying information pertinent to an uncompleted subdivision, office building complex, shopping center or industrial district shall be permitted within that ownership, provided that no such sign shall be closer than 200 feet to an occupied dwelling. This sign shall be considered temporary and shall be removed when a substantial amount of the development is completed. The sign shall not exceed 100 sq. ft. in area. Only one sign per street frontage shall be permitted. This regulation shall apply to construction and leasing signs.

B. All signs be of sound structural quality, be maintained in good repair, have a clean and neat appearance, and land adjacent shall be kept free from debris, weeds and trash.

C. All signs as permitted above shall be so constructed and installed as to be satisfactory to the City Architect.

D. No sign shall be installed, erected or set in place until a sign permit has been issued therefor by the City of Leawood. Such permits shall be clearly visible at all times and indicating the number of the permit issued therefor.

E. Temporary signs may be granted by permit issued by the City Council allowing the maintenance of signs in excess of the number allowed an individual business as set forth in this section. Each temporary sign permit shall be effective for a period of time not to exceed 30 days. Failure to comply with any specification, regulation and control placed on a temporary sign permit by the City Architect will immediately void said permit.

F. Private sign standards required. In the case of an office park, hotel or motor hotel, shopping center, industrial park or other grouping of three or more buildings, tenants or establishments, the developer shall prepare a set of sign standards regulating all signs. Such standards shall run with all leases or sales of portions of the development. The size, colors, materials, styles of lettering, appearance of any logo, type of illumination and location shall be set out in such standards. The standards shall be within the regulations set out in the codes of Leawood and shall be for the purpose of assuring harmony and visual quality throughout a project. Final development plans shall not be approved until the Plan Commission has approved the sign standards after having been assured that such standards will be enforced by the developer or owner. For purposes of this section the terms "shopping center, business park, office park, industrial park or other grouping" shall mean a project of one or more buildings that has been planned as an
integrated unit or cluster on property under unified control or ownership at the time that zoning was approved by the City. The sale, subdivision or other partition of the site after zoning approval does not exempt the project or portions thereof from complying with these regulations relative to number of detached signs, harmony and visual quality of signs to be installed.

G. Rotating, flashing, animated signs or signs having exposed neon tubing or digital readout or other source of illumination that is visible from off the premises and signs painted directly on building walls are prohibited in all districts.

ARTICLE 26. COMPLETION AND RESTORATION OF BUILDINGS

15-2601 Application of this Article.

Nothing contained in this ordinance shall require any change in the plans, construction or designated use of a building for which a building permit has been heretofore issued, and plans for which are on file with the City of Leawood at the time of the passage of this ordinance and the construction of which shall have been commenced within six months of the date of such permit.

15-2602 Buildings Destroyed Less Than Fifty Percent.

Nothing in this ordinance shall be taken to prevent the restoration, within six months, of a nonconforming building destroyed to the extent of not more than fifty percent of its structural value by fire, explosion, or act of God, provided that when such restoration becomes involved in litigation, the time required for such litigation shall not be counted as a part of the six months required for reconstruction; and nothing in this ordinance shall be taken to prevent the continued occupancy or use of such building or part thereof which existed at the time of such partial destruction, but any building so damaged more than fifty percent of its value may not be rebuilt, repaired, or used unless it is made to conform to all regulations for buildings in the district in which it is located.

ARTICLE 27. LANDSCAPING AND SCREENING

15-2701 Generally.

All plans submitted in support of a building permit application, except single-family dwellings, shall hereafter include a landscape plan and include screening where appropriate. All land areas which are to be unpaved or not covered by buildings shall be brought to finished grade, planted to grass or other ground cover and receive trees and shrubs in reasonable quantity and size.

15-2702 Intent.

The purpose of such landscaping is to provide greenery to visually soften paved areas and buildings, provide shade, give maximum absorption of surface water and generally enhance the quality and appearance over the entire area of the project. Plant material shall be generally native to the area and shall consist, for the most part, of growing vegetation.
15-2703 Planting Requirements.
Shade trees shall be planted on all projects and shall include such species as ash, sycamore, maple, oak or comparable trees suitable to the growing environment which prevails. Shade trees shall be of 2 to 2-1/2 inch trunk diameter or greater, measured one foot above the ground. Shade trees shall be planted in not less than the following quantities:

A. In lawn areas for landscaped open space, one shade tree per three thousand square feet of such lawn or landscaped open space.

B. In parking lots, one island for each thirty parking spaces, each such island to be protected by portland cement concrete vertical curbs or similar permanent structure, be not less than the size of one parking space, and contain one or more shade trees, shrubs and ground cover. Such islands shall be spaced in the parking lot in such a manner as to provide greenery and shade in the various sections of the paved area, but may be combined into larger planting areas.

In addition to the above minimum shade tree requirements reasonable quantities of ornamental trees, shrubs and foundation plantings shall be included.

15-2704 Screening Requirements.
All multi-family residential projects and all commercial, office and industrial projects shall include, on the landscape plan, a detailed drawing of enclosure and screening methods to be used in connection with trash bins on the property. No trash bin shall be visible from off the property and a permanent masonry or frame enclosure shall be provided each bin.

All buildings or additions thereto in Districts CP-0 to MP-1 inclusive shall provide a solid screen fence or wall not less than six feet in height along all rear and side property lines which are common to property zoned for residential purposes except that such screening shall not extend in front of the building line of adjacent dwellings and shall not be required where such screening exists on the abutting residential property.

15-2705 Landscaping in Place Prior to Occupancy Permit.
All landscaping and screening shall be in place prior to issuance of final occupancy permit; however, a temporary certificate may be issued without the installation of landscaping if seasonal limitations prevent its planting, provided assurances are given that the planting will take place when the season arrives.

15-2706 Maintenance.
The trees, shrubs and other landscaping materials depicted on plans approved by the City shall be considered as elements of the project the same as parking areas, building materials and other plan details. Should such planting not be installed, maintained and replaced as is needed to comply with the approved plan, the owner shall be considered to be in violation of the terms of the building or occupancy permit and appropriate action may be taken.

Properly located hose connections and other watering facilities shall be provided to allow the required maintenance without undue difficulty or hardship on the tenant.
ARTICLE 28. ENFORCEMENT AND PERMITS

15-2801 Action on Application For Building or Land Use Permit.
The City Architect or his duly authorized representative shall be empowered to act within the provisions of this ordinance upon all applications for permits. In the event of refusal to issue a permit upon an application, as herein provided, the applicant shall have the right to appeal to the Board of Zoning Appeals as set forth in Article 30.

In the event of refusal to issue a permit upon an application, as provided in this article, the applicant shall have the right to appeal to the Board of Zoning Appeals as set forth in Article 30.
15-2806 Fee schedule for Building and Land Use Permits.

For each permit issued there shall be charged and collected from the applicant a fee in accordance with the provisions of Section _, Rev. Ord. of City of Leawood, unless another fee is specifically provided for in this ordinance.

15-2807 Revocation of Permit.

A permit may be revoked by the City Architect at any time prior to the completion of the building or structure for which the same was issued, when it appears to him that there is departure from the plans, specifications, or conditions as required under terms of the permit, that the same was procured by false representation or was issued by mistake, or that any of the provisions of this ordinance are being violated. Written notice of such revocation shall be served upon the owner, his agent or contractor, or upon any person employed on the building or structure for which such permit was issued, or shall be posted in a prominent location, and thereafter no such construction shall proceed.

15-2808 Minimum Street Rights-of-way.

When a building or land use permit is requested on a lot or tract abutting a public street, the City Architect shall determine that adequate right-of-way exists on that portion of the public street abutting the property. The minimum right-of-way, measured from the centerline of the street to the property line of the lot or tract, shall be as follows:

- A. Single and two-family area - 25 feet except that where property abuts a collector or arterial street the right-of-way shall be as set out below.
- B. Multiple-dwelling and industrial areas - 30 feet;
- C. Minor collector - 30 feet;
- D. Commercial streets - 30 to 40 feet;
- E. Major collectors and secondary arterials - 50 feet except that additional width shall be provided where steep topography or demand for extra lanes requires;
- F. Primary arterials - 50 to 60 feet.

Street classification shall be determined by abutting land use or as depicted on the Major Street Plan.

15-2809 Non-Compliance With Right-of-way Requirements - Action.

In any case where the abutting right-of-way does not clearly comply with the above dimensions, a building or land use permit shall not be issued for the lot or tract until title for the required additional right-of-way has been conveyed to the City.

ARTICLE 29. CERTIFICATES OF OCCUPANCY

15-2901 Changes Not To Be Made Until Issued.

No change in the character of use of land or of a building shall be made, nor shall any new or old building or structure be so occupied or used until a certificate of occupancy is issued by the City Architect or his authorized
representative certifying that such building or use complies with all regulations of the zoning ordinance, building code and all other ordinances and regulations applicable thereto.

15-2902 Records - Furnishing Copies.
A record of all certificates of occupancy shall be kept on file in the office of the City Architect, and copies shall be furnished on request to any persons having a proprietary or tenancy interest in land or building affected by such certificate of occupancy.

15-2903 Parking.
Before a certificate of occupancy is issued on a new use or change in use of an existing building or structure, all parking requirements as specified elsewhere in this ordinance shall be met.

ARTICLE 30. BOARD OF ZONING APPEALS

15-3001 Members.
The Board of Zoning Appeals shall consist of five (5) members, all of whom shall be residents of the City, and who shall be appointed by the Mayor, by and with the consent of the Council. None of the members shall hold any other public office of the City, except that one member may be a member of the Plan Commission.

A. Term. Each member shall serve for a term of three years and shall be appointed at the organizational meeting of the Governing Body held the first Monday in May of each year. Appointments shall be so staggered that no more than two members' terms shall expire in one year. Vacancies shall be filled by appointment of the Mayor, by and with the consent of the Council, as said vacancies occur. The appointment shall be for the balance of the unexpired term.

B. Compensation. Members of the Board of Zoning Appeals shall serve without compensation.

C. Officers. The Board of Zoning Appeals shall annually elect one of its members as Chairman, and shall appoint a secretary, who may be an officer or an employee of the City.

D. Rules. The Board shall from time to time adopt rules of procedure to regulate the conduct of its business. Such rules shall be submitted by recommendation of the Board of Zoning Appeals to the Governing Body in resolution form for approval.

E. Meetings. Meetings of the Board shall be held on the third Wednesday of each month and at such other times as the Board may determine to be required for the conduct of its meetings or upon call of the chairman. Meetings shall be held at the City Hall unless circumstances make that location impracticable for a particular session, in which case, said meeting shall be held at any convenient place within the City.

F. Records. The Board of Zoning Appeals shall keep minutes of its proceedings, showing evidence presented, findings of fact by the Board, decisions of the Board and the vote upon each question. Records of all official actions of the Board shall be filed in its office which shall be in the office of the City Clerk and shall be a public record.
The Board of Zoning Appeals shall administer the details of appeals from, or other matters referred to it regarding, the application of the Zoning Ordinance as hereinafter provided. The Board:

A. Shall hear and decide appeals by any person, officer of the City, government agency or body affected by any decision of the officer administering the provisions of the Zoning Ordinance.

B. Shall hear and decide appeals where it is alleged there is error in any order, requirement, decision or determination made by an officer administering the enforcement of the Zoning Ordinance.

C. May, when it shall deem the same necessary, grant variances to the Zoning Ordinance to authorize, in specific cases, a variance from the specific terms of the ordinance which will not be contrary to the public interest and where, owing to special conditions, a literal enforcement of the provisions of the ordinance will, in an individual case, result in unnecessary hardship, and provided that the spirit of the ordinance shall be observed, public safety and welfare secured and substantial justice done. Such variance shall not permit any use not permitted by the Zoning Ordinance in the use district within which the particular property be located.

A request for a variance may be granted in such cases, upon a finding of the Board that all of the following conditions have been met:

1. That the variance requested arises from such condition which is unique to the property in question and which is not ordinarily found in the same zone or district, and is not created by an action or actions of the property owner or applicant.

2. That the granting of the permit for the variance will not adversely affect the rights of the adjacent property owner or residents.

3. That the strict application of the provisions of the Zoning Ordinance on which variance is requested will constitute unnecessary hardship upon the property owner represented in the application;

4. That the variance desired will not adversely affect the public safety, health, morals, order, convenience, prosperity or general welfare; and

5. That granting the variance desired will not be opposed to the general spirit and intent of the Zoning Ordinance.

D. May, when it shall deem the same necessary, grant exceptions to the provisions of the Zoning Ordinance in those instances where the Board is specifically authorized to grant such exceptions and only under the terms of the Zoning Ordinance.

In no event shall exceptions to the provisions of the Zoning Ordinance be granted where the use or exception contemplated is not specifically listed as an exception in the Zoning Ordinance. Further, under no conditions shall the Board of Zoning Appeals have the power to grant an exception when conditions of the exception as established by the Governing Body are not found to be present.
E. Shall have the power, in specific cases, to modify or vary building or setback lines on streets for which a building or setback line has been adopted by the governing body as part of its comprehensive plan in order that unwarranted hardship, which constitutes complete deprivation of use as distinguished from merely granting a privilege, may be avoided, yet the intended purpose of the regulations shall be strictly observed and the public and public safety protected.

In exercising the foregoing powers, the Board, in conformity with the provisions of this Article, may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, or determination, and to that end shall have all the powers of the officer from whom the appeal is taken, may attach appropriate conditions and may order issuance of a permit.

15-3003 Procedure on Application to the Board of Zoning Appeals.

A. Appeals to the Board of Zoning Appeals shall be initiated by the applicant within a reasonable time after the decision appealed from has been made. Applicant shall file with the City a notice of appeal setting forth the specific grounds therefor.

Applications for amendment, revision or change of any portion of the Zoning Ordinance, may be made by any interested person.

A tract of land may be zoned RP-I through MP-I inclusive, only upon application by the owner or his agent, and only upon approval of a development plan. The proponents of a planned district shall prepare and submit to the planning department ten copies of:

A. A development plan showing the property to be included in the proposed development, plus the area within two hundred feet thereof.

B. The following items shall be included on the property to be developed:
   1. Existing topography with contours at five foot intervals, and delineating any land areas subject to one hundred-year flood.
   2. Proposed location of buildings and other structures, parking areas, drives, walks, screening, drainage patterns, public streets, and any existing easements.
   3. Sufficient dimensions to indicate relationship between buildings, property lines, parking areas, and other elements of the plan.
   4. General extent and character of proposed landscaping.

C. The following items shall be shown on the same drawing within the two hundred foot adjacent area:
   1. Any public streets which are of record.
   2. Any drives which exist or which are proposed to the degree that they appear on plans on file with the City except those serving single-family houses.
   3. Any buildings which exist or are proposed to the degree that their location and size are shown on plans on file with the City. Single and two-family residential buildings may be shown in approximate location and general size and shape.
   4. The location and size of any drainage structure, such as culverts, paved or earthen ditches or storm sewers and inlets.

D. Preliminary sketches depicting the general style, size and exterior construction materials of the buildings proposed. In the event of several buildings, a typical sketch may be submitted. In case several building types, such as apartments and business buildings are proposed on the plan, a separate sketch shall be prepared for each type. Such sketches shall include elevation drawings, but detailed drawings and perspectives are not required.

E. A schedule shall be included indicating total floor area, dwelling units, land area, parking spaces and other quantities relative to the submitted plan in order that compliance with requirements of this ordinance can be determined.

The Plan Commission shall hold a public hearing on the plan as provided by law. At such time as the development as planned meets with the approval of the Commission, the same shall be duly approved, properly endorsed and identified and sent on to the Council for action.
Upon final approval of the plan and the rezoning of the tract, con-

all to be in keeping with the development plan as approved. If, in
the judgment of the Commission, the concept of development, as depicted
on the final plans, deviates substantially from the concept of the de-
velopment plan submitted for zoning, the Commission shall deny the request
for final plan approval. A final development plan shall not be approved
by the Commission if deviation from the approved preliminary:

1. Increases density or intensity of residential uses more than 5
   percent.

2. Increases the floor area of non-residential buildings by more
   than 10 percent.

3. Increases by more than 5 percent the ground covered by buildings,
   or;

4. Increases the height of a building by one or more stories.

5. Involves changes in ownership patterns or stages of construction
   that will lead to a different development concept, less archi-
   tectural harmony or quality or impose substantially greater loads
   on streets and neighborhood facilities.

Denial of final plans by the Plan Commission may be appealed to the Council
who may reverse or reaffirm the Commission's decision. The applicant, in the case
of denial, by either the Plan Commission or Council, may apply for a new hearing,
with publication and posting as required in this Article, which procedure consti-
tutes a rezoning action, and the Commission and Council may approve or deny the
final plans after said procedure.

Such traffic study shall show how the traffic generated by the proposed development will be handled on the site in an orderly and efficient manner, and how vehicular ingress and egress from the site onto public streets will function.

The purpose of this Ordinance is to guide and regulate the subdivision of land within the City of Leawood, Kansas, in order to preserve and protect the public health, safety and welfare. The Planning Commission and Council shall not approve the subdivision of land if, from adequate investigations conducted by all public agencies concerned, it has been determined that the best interests of the public are not being served, and the site, as presented, is not suitable for platting and development for those purposes proposed.

Land subject to flooding and land deemed to be topographically unsuited shall not be platted for residential purposes, nor for such other uses as shall cause undue damage to the natural environment, increase danger to health, life or property, or aggravate erosion or cause flood hazards. Such excessively steep or flood prone land within the plat shall be set aside for those uses that will not be endangered by periodic flooding and will not produce unsatisfactory living conditions.

If the final plat is disapproved, grounds for this refusal shall be stated in writing, a copy of which shall be transmitted to the applicant.

F. City Council Action. Before recording the final plat, it shall be submitted to the City Council for approval and acceptance of public ways and service and utility easements and land dedicated to public use. This approval of the plat shall be shown over the signature of the Mayor and attested to by the City Clerk or his deputy. The disapproval of any plat or plan by the City Council shall be deemed a refusal of the proposed dedication shown thereon.

G. Recording of the Plat. After final approval of the plat and the affixing of all required signatures on the original tracing, the subdivider shall provide the City with five (5) black or blue line prints thereof, and two contact prints on linen. The City Clerk shall file one linen print and one black or blue line print with the Johnson County Register of Deeds.

ARTICLE 3. DESIGN

Sec. 17-301 DESIGN PRINCIPLES. The quality of design of an urban area is dependent on the quality of design of the individual subdivisions that compose it. Good community design requires the coordination of the efforts of each subdivider and developer of land within the City. Therefore, the design of each subdivision shall be prepared in accordance with the principles established by the Comprehensive Development Plan for land use, circulation, community facilities, and public utility services and in accordance with the following general principles:

A. It is intended that the urban area shall be designed as a group of integrated residential neighborhoods and appropriate commercial, industrial and public facilities.

B. The size of lots and blocks and other areas for residential, commercial, industrial and public uses shall be designed to provide adequate light, air, open space, landscaping, and off-street parking and loading facilities.

C. The arrangement of lots and blocks and the street system shall be designed to make the most advantageous use of topography and natural physical features. Tree masses and large individual trees shall be preserved wherever possible. The system of sidewalks and roadways and the lot layout shall be designed to take advantage of the visual qualities of the area.
D. Circulation within the City shall be provided in accordance with the following design criteria:

1. Each subdivision shall provide for the continuation of all major streets and highways as shown on the Major Street Plan.

2. Local streets shall be designed to provide access to each parcel of land within the residential neighborhood in a manner that will discourage use by through traffic. They shall be planned so that future urban expansion will not require the conversion of local streets to collectors or thoroughfares.

3. Collector streets shall be designed to provide direct access from local streets to the major thoroughfare and expressway systems.

4. Ingress and egress to residential properties shall be limited to the extent possible to local and collector streets.

5. Pedestrian ways shall be separated from roadways used by vehicular traffic. Sidewalks and/or bikeways shall be required and shall be designed to provide all residential building sites with direct access to all neighborhood facilities, including the elementary school, parks, playgrounds, churches, and shopping centers.
E. In order to achieve the objective of preservation of property values and quality of life, the Plan Commission and City Council may, in the subdivision approval process, require various design modifications and allow exceptions from these rules if, in their judgement, the public welfare will be served. The mere compliance with the minimum standards set out herein shall not assure approval of a subdivision. The Plan Commission may, in its review of preliminary and final plats, require, among others, the following if the public interest is served and if the requirement is not unreasonable or inequitable to any party:

1. Construct walkways or bicycle paths along streets.

2. Construct walkways or bicycle paths on alignments that are not along streets but along rear lot lines, drainageways, etc.

3. Provide larger lots than the required minimum if transition from a large lot subdivision is needed to preserve property values.

4. Disapprove subdivisions in locations where sanitary sewer systems are not available for disposal of waste water if evidence or past experience indicates that contamination of surface or ground water will occur or if installation of a system of sewers and temporary treatment is feasible.

5. Disapprove or delay subdivisions in locations where current street access to the subdivision does not have an adequate, safe and all-weather type surface.

6. Require adjustments and special protective measures in street and lot planning where flood plains exist or where surface runoff is concentrated to the degree that erosion is likely or danger to life or property may exist.
7. Approve preliminary plats for subdivisions where the actual development of the entire subdivision cannot logically proceed until provision of such public works elements as boundary street pavement or sanitary sewers are in place. In such cases the Commission and Council may delay approval of final plats or the issuance of building permits on certain designated lots in the subdivision until the public works elements are completed or their completion assured.

F. Minimum standards for development are contained in the Leawood Zoning Ordinance, the City Building Code, the Leawood Street Construction Standards and in this Ordinance. In addition, the Comprehensive Development Plan expresses policies designed to achieve an optimum quality of development in the City.

SUBDIVISION REGULATIONS 1-16-78

Sec. 17-302 SUBDIVISION DESIGN STANDARDS

A. Streets. The arrangement, character, extent, width, grade and location of all streets shall conform to all of the elements of the Major Street Plan and shall be designed in accordance with the following provisions:

1. Major streets shall be planned to conform with the Major Street Plan.

2. Whenever a subdivision abuts or contains an existing or proposed major street, the Plan Commission may require service streets, reverse frontage with screen planting contained in a non-access reservation along the rear property line, deep lots, or such other treatment as may be necessary for adequate protection of residential properties and to afford separation of through and local traffic.
3. Local streets shall be laid out so that their use by through traffic will be discouraged.

4. Where a subdivision borders on or contains a railroad right-of-way or limited access highway right-of-way, the Plan Commission may require a street approximately parallel to and on each side of such right-of-way at a distance suitable for the appropriate use of the intervening land. Such distances shall also be determined with due regard to the requirements of approach grades and future grade separation structures.

5. Reserve strips controlling access to streets shall be prohibited except where their control is placed in the City under conditions approved by the Plan Commission.

6. Where the plat to be submitted includes only part of the tract owned or intended for development by the subdivider, a tentative plan of a proposed future street system for the unsubdivided portion shall be prepared and submitted by the subdivider.

7. When a tract is subdivided into larger than normal building lots or parcels, such lots or parcels shall be so arranged as to permit the logical location and opening of future streets and appropriate resubdivision, with provision for adequate utility easements and connections for such resubdivision.

8. Street jogs with centerline offsets of less than one hundred and fifty (150) feet shall not be permitted.

9. Streets shall intersect at approximately right angles and no street should intersect any other street at an angle of less than seventy-five (75) degrees.

10. Street rights-of-way, pavement widths, maximum and minimum gradients, sight distance requirements, horizontal and vertical alignment, and other design elements shall be in accordance with the Leawood Street Construction Standards based on the street classification shown on the Major Street Plan. Where unusual topographic conditions exist in the opinion of the Plan Commission and the City Engineer, slight modification from these standards may be permitted. New streets not shown on the Major Street Plan shall be designed to local street standards unless the Plan Commission determines that higher design standards are required to serve anticipated traffic demands.
11. A cul-de-sac shall not exceed five hundred (500) feet in length, measured from the entrance to the center of the turnaround. The turnaround shall have an outside property line radius of not less than 50 feet and a curbline radius of 40 feet. There shall be provided in the center of the turnaround an unpaved island improved with grass and landscaping that will not interfere with sight distance. Said unpaved area shall have a radius of not less than twelve (12) feet and shall be curbed.

12. Half streets shall be prohibited, except where essential to the reasonable development of the subdivision in conformity with the other requirements of these regulations and provided that the Plan Commission finds it will be practical to obtain the dedication of the other half of the street right-of-way within a reasonable time.

13. The arrangement of streets shall be such as to facilitate the subdividing of adjacent properties. Street stubs shall be platted and paved at intervals in keeping with maximum block length standards, topography and property lines of land adjacent.

14. Street names and numbers shall be assigned by the City of Leawood.

A.1. Scope of Ordinance. This ordinance shall deal exclusively with private streets. Any other reference to streets in this section shall be construed to be a reference to public streets.

a. Private streets shall be allowed only within residential developments as defined and authorized in Article 10 of the Leawood Zoning Regulations.

b. Plats with private streets shall have the private streets clearly and boldly marked on the drawing portion, as well as in the written portion.

c. All private streets which are platted after the adoption of this ordinance shall remain as private streets in perpetuity.

d. Any person making application for an occupancy permit for a residence constructed within a subdivision containing a private street, shall certify to the City that he has mailed by restricted certified mail to the initial purchaser of said residence a copy of the declaration of restrictions along with a letter calling particular attention to the fact that the residence may be subject to assessments for the maintenance of private streets within the subdivision or development.

-21- 12-9-80
e. The City will install a standard "private street sign" at each private street connection to a public street at the developer's expense.

f. Each private street shall be designed and constructed to handle its and any connecting street's traffic loading.

g. All design factors of a private street shall be considered on an individual basis with the following minimum requirements:

1. 28 feet wide, back to back of curb
2. 8 inch pavement thickness, conforming to City standards
3. 12% minimum and 12% maximum gradients
4. 25 miles per hour sight radius
5. 65 foot center line radius.

h. Lay down type curb and gutter, as approved by the City shall be constructed along the public street curb line at the intersection of each public and private street, thus forming a ribbon of concrete separating the public and private street.

i. A public safety covenant in a form to be approved by the City shall be filed of record.

j. Street lights and/or sidewalks may be installed at the developer's discretion. In the event street lights and/or sidewalks are installed, their installations and their continued maintenance shall be the responsibility of the developer.

k. Adequate utility easements shall be provided.

B. Easements.

Easements not less than fifteen (15) feet wide shall be provided for use by public and private utilities along each rear lot line, and along side lot lines where necessary, in the following manner:

a. A permanent easement not less than seven and one-half (7-½) feet wide shall be provided along the rear lot line, or along the side lot line where necessary, of each abutting or adjoining lot.

b. Where the land owned and being subdivided ends at a rear or side lot line and the subdivider is unable to obtain from the adjoining property owners an easement not less than seven and one-half (7-½) feet wide, the Plan Commission upon finding that the easement will be available from the adjoining property owners at a future date, may approve the grant of an easement along each rear lot line, or side lot line where necessary, not less than ten (10) feet.
c. Easements shall be maintained free of buildings or structures. The Plan Commission may require area easements and easements of greater width for the extension of main storm and sanitary sewers, surface drainageways and other utilities where it is deemed necessary.

C. Storm Drainage. All subdivisions shall be provided with storm water disposal systems in compliance with the DESIGN CRITERIA FOR STORM SEWERS AND APPURTENANCES published by the Kansas City Metropolitan Chapter of the American Public Works Association and amendments thereto. Hydrological calculations shall utilize a time of concentration (TC) of ten minutes unless otherwise directed by the City Engineer. All subdivision plats shall include easements for purposes of access to and protection of underground and surface drainageways. Where drainageways serve a sufficiently large area that underground pipe is impractical, the City may require the subdivider to either perform channel improvements or, in the alternative, dedicate an easement of greater width than the drainageway currently requires in order to allow for overflow and sideslope deterioration. In addition, the calculated one hundred year flood elevation, as computed by a registered engineer, shall be depicted on the preliminary plat and submitted to the City Engineer with the Public Works Elements. This calculation and mapped flood line shall be submitted regardless of the presence of any flood plain as shown on the Flood Insurance Rate Maps of the Flood Insurance Agency. In case such flood prone area occurs within the subdivision the subdivider shall provide assurance that any building constructed in the flood prone area will have its lowest opening at or above the said 100 year flood elevation. Any grading within the flood prone area shall not proceed until review and approval is received from the Kansas Board of Water Resources as set out in K.S.A. 74-2611. In addition, the 100 year Floodway as depicted on the Flood Insurance Map, Department of Housing and Urban Development, shall be shown on the same preliminary plat if applicable to any portion of the subdivision.

Alternative methods of handling surface water may be required or permitted by the Plan Commission and City Council upon recommendation of the City Engineer. Such alternatives may include retention or detention basins, rooftop or parking lot detention, bank stabilization, velocity dissipation techniques and other methods that are shown to be in the long term public interest.

Prior to issuance of a building permit within a subdivision, the City Architect shall review a plot plan submitted by the applicant indicating finished grades for each lot and specifying by proper indications thereon the direction of flow of surface drainage and facilities for its disposition adequately to preclude damage to any adjacent property by virtue of such drainage.

-23- 12-9-80
D. Public Areas and Open Spaces. Public parks, playgrounds, school sites and other public areas and open spaces shall be provided in accordance with the requirements and standards set forth in the Comprehensive Development Plan as amended and in the ordinances relating thereto.

E. Blocks.

1. The lengths, widths and shapes of blocks will be determined with due regard to the following:
   a. Provision shall be made for the use of adequate building sites suitable for the special needs of the type of use contemplated.
   b. Zoning requirements as to lot sizes and dimensions shall be met.
   c. The proposed subdivision must be designed to provide the needs for convenient access, circulation, control and street safety.
   d. The subdivision shall be designed to function adequately within the limitations and opportunities provided by the topography of the site.

2. Blocks for residential use shall not be longer than eighteen hundred (1,800) feet along the center line of the block. When a block exceeds six hundred feet (600) in length, the Plan Commission may require a dedicated and fenced easement containing a paved 'crosswalk not less than five (5) feet in width to provide pedestrian access across the block.

3. Blocks used for residential purposes shall be of sufficient width to allow for two tiers of lots of appropriate depth. Blocks intended for business and industrial use shall be of a width suitable for the intended use, with due allowance for screening and off-street parking and loading facilities.
F. Lots.

1. Residential lots shall have a width not less than that specified in the Leawood Zoning Ordinance. Lots fronting on a cul de sac turn around shall have a frontage on the turn around of not less than forty-five (45) feet. Lots shall be of a generally symmetrical shape, shall permit construction of a broad range of building shapes and sizes, shall not have a depth greater than three times the width and shall have its buildable width generally face, and directly relate to, the street upon which it fronts.

2. Side lot lines shall be approximately at right angles or radial to street lines.

3. The depth of residential lots shall be not less than one hundred and twenty (120) feet or that specified in the Zoning Ordinance, whichever is greater.

4. The area of residential lots shall be not less than twelve thousand (12,000) square feet or that specified in the Zoning Ordinance, whichever is greater.

5. In subdivisions where commercial and industrial uses are planned, provisions shall be made for adequate street access, off-street parking and loading, varying lot sizes, avoidance of face to face relationships with residential lots and shall utilize transitional land use patterns where possible.

G. Building Lines. Building lines along all front and side streets shall be shown on the final plat and shall, as a minimum, comply with yard requirements of the Leawood Zoning Ordinance.

ORD. NO. 683 11-3-80
Sec. 17-303 LOT SPLITS. A previously platted lot containing no building, and which abuts no platted lot which contains a building, may be divided as a lot split by either metes and bounds description or by replat provided the lot sizes produced shall comply with the Leawood Zoning Ordinances. If such lot is to be divided by metes and bounds description, however, it may be so divided only one time and by only one new dividing lot line and shall not again be divided without replatting. Such lot split need not comply with procedures set out in this ordinance but may be approved by the City Engineer prior to issuance of a building permit on any portion thereof. A lot to be divided more than one time, or involving more than one new dividing line, or where a building exists on the lot or on an abutting lot, shall be considered a replat and shall be subject to the same procedure as any subdivision as set out herein.

SUBDIVISION REGULATIONS 1-16-78

ARTICLE 4. IMPROVEMENTS

Sec. 17-401 MAJOR STREET PLAN AND STREET CLASSIFICATIONS. The Major Street Plan of the City establishes a street classification which is intended to tailor the design of each street to its function. These classifications are set out by the Major Street Plan Map dated April 18, 1983, and are described as:

1. A primary arterial street shall be designed to carry through traffic and shall require a right-of-way width of 120 feet. There are two pavement widths of 25 feet each back-to-back of curb.

2. A secondary arterial street is designed to serve as part of the principal network for through traffic, carrying fewer vehicles than the primary arterial street. The required right-of-way width is 100 feet. The pavement width is 48 feet back-to-back of curb.

3. An urban residential collector street shall provide the traffic movement and access needs of urban residential neighborhood traffic. The right-of-way width is 60 feet and the pavement width is 36 feet back-to-back of curb.

4. An urban residential street shall serve residential neighborhoods. The right-of-way width is 50 feet and the pavement width is 26 feet back-to-back of curb.

5. A primary collector street shall have a right-of-way width of 80 feet. The pavement width is 36 feet back-to-back of curb.

6. A rural collector street provides general access needs to the rural land areas south of 135th Street. The right-of-way width is 80 feet and the pavement width is 32 feet with ditch sections.
7. A rural residential street provides access to rural residential neighborhoods. The right-of-way width is 60 feet and the pavement width is 22 feet with ditch sections.

Sec. 17-402 GENERAL PROVISIONS. It is the intent of the City Council of the City of Leawood that all subdivisions shall hereafter contain all the improvements required for the highest practical level of safety and welfare of the inhabitants of the subdivisions. Since the City at large will assume responsibility for maintaining and sustaining the public works elements in perpetuity it is the intent of the City Council that those elements be of high quality, designed for the longest practical life and be capable of low cost maintenance throughout the life of the project. It shall therefore be the responsibility of the subdivider to install, at his initiative and cost, all public works elements in the subdivision, or arrange for their installation through irrevocable agreements such as formation of benefit districts, surety bond, cash escrow, etc. except those which are deemed to basically serve the City at large.

Sec. 17-403 REQUIRED IMPROVEMENTS. The following shall be the minimum required improvements in a subdivision.

A. Street pavement, curbs and sidewalks for all local and collector streets shall be constructed to the design standards included in the "Public Improvement Construction Standards" of the City of Leawood, Kansas. Where a local or collector street abuts a subdivision, the subdivider shall make satisfactory arrangements to pay fifty (50) percent of the cost to develop said street to the standards described herein and shall dedicate one-half of the required right-of-way. Where a designated arterial street abuts the property owner's land, the property owner shall make satisfactory arrangements to pay fifty (50) percent of the cost to develop said street to the standards prescribed for a primary collector and shall dedicate one-half of the right-of-way needed for an arterial street. When a designated arterial street runs completely through the property owner's land, the owner shall be required to pay one hundred (100) percent of the cost to develop said street to the standards prescribed herein for a primary collector street and dedicate the required right-of-way for the arterial facility. In cases, however, where unusual ownership patterns, abnormal street or road conditions, location of the subdivision on unimproved roadways and other circumstances make this procedure unworkable, inequitable or contrary to the public interest, the Plan Commission may, subject to approval by the City Council, negotiate alternative methods of achieving acceptable improvements.

B. Storm water handling facilities shall be designed and installed throughout the subdivision by the subdivider. Design shall comply with DESIGN CRITERIA FOR STORM SEWERS AND APPURTENANCES.

-27- 8-15-83
published by the Kansas City Metropolitan Chapter of the American Public Works Association, and amendments thereto, except as indicated in the City of Leawood's "Public Improvement Construction Standards". All storm water facilities shall be designed by a professional engineer registered in the State of Kansas and the preliminary plans shall be approved by the Director of Public Works so certified to the Plan Commission prior to approval of the final plat.

C. Sidewalks and/or bikeways shall be included in all subdivisions. A sidewalk shall be constructed along one side of all local streets and both sides of all major streets and streets in multi-family and commercial areas. Paved bikeways may be substituted for or provided in addition to sidewalks where such a facility would benefit the public or comply with the parks and recreation plan of the City. Sidewalks, and bikeways, if practical, shall be shown on the preliminary plat.

D. Water lines shall be installed by the subdivider in keeping with policies and specifications of the water district serving the subdivision. Fire hydrants shall be installed as part of the water main construction.

E. Sanitary sewers shall be installed by the subdivider in keeping with local and state standards. Where no system of mains or treatment is available the Plan Commission may deny the subdivision or require special engineering documentation supporting an alternative sewage disposal system.

F. Street lighting standards and fixtures shall be provided in accordance with the City's Street Lighting Standards and Specifications.

G. Standard City of Leawood street name markers shall be prepared and installed on all street intersections by the City of Leawood Public Works Department. The subdivision developer will be issued a statement of cost by the Leawood Public Works Department for all materials and labor required for the preparation and installation of the street name markers. Payment must be received prior to any building permits being issued within the subdivision.

H. Monuments in the form of iron pins not less than one-half inch in diameter and 24 inches in length shall be driven to one inch below the final grade at each block corner. Corners of the subdivision shall be marked with steel pin not less than three-fourths inch in diameter and three feet in length, driven to one inch below final grade. The Director of Public Works may require additional monuments where the public interest will be served.
I. Tree planting and other landscaping located within public right-of-way shall be regulated and approved by the City of Leawood to prevent interference with public sidewalks, street lighting or safe site distance at any street intersection or private driveway. All such trees or other landscaping shall not be the responsibility of the City of Leawood but shall be the responsibility of a homes association or other acceptable type organizations duly registered with the City of Leawood. Such organizations shall totally maintain the trees and other landscaping such as growth, trimming, removal and replacement.

Sec. 17-404 ENFORCEMENT. It is the intent of the City Council of the City of Leawood that the above required improvements or public works elements be installed in a competent and timely fashion and that the residents of homes built in the subdivision shall have the full range of services provided by the improvements beginning with initial occupancy of the home. Therefore, no building permit shall be issued for a building to be placed on a lot which is not fully served by all of these improvements. For purposes of this ordinance "being fully served" shall mean that sanitary sewers (except where alternate methods are used), water supply, street pavement, sidewalks/bikeways, storm sewers, street lighting, street markers and monuments shall be installed, duly inspected and found acceptable, accepted by the City Council, and service connections, if appropriate, applied for. In the event that building permits are desired before all of the improvements are in place, the subdivider may place with the City of Leawood performance surety, in the form of bond, cash escrow or other acceptable means guaranteeing the installation of all improvements, whereupon building permits may be issued. The amount of surety shall be equal to 100% of the estimated cost of all improvements as determined by the Director of Public Works. Such surety and the issuance of building permits may be in increments as may be deemed practical by the Director of Public Works and the City Architect, but in no case less than one full block length of street.

Sec. 17-405 MAINTENANCE SURETY. The subdivider or the contractors responsible for the construction of public street pavement, curbs and gutters, storm sewers, sidewalks, bikeways, street markers and street lighting shall deposit surety in the form of bond, cash, or other acceptable methods with the City guaranteeing against failure of any of those public works elements for a period of two years following acceptance by the City. The amount of surety shall be determined by the Director of Public Works and shall be generally equal to the cost of construction. In the case of a performance surety being used as set out in Section 5 above, that surety may be retained by the City for two years following acceptance of the public works elements in satisfaction of this maintenance bond requirement. Release of maintenance surety shall be by the recommendation of the Director of Public Works and reported to the City Council. The Director shall inform the developer, in writing, that the public works improvements are in satisfactory condition and that the developer is released from the Maintenance Surety, and that the City of Leawood accepts the public works improvements and the maintenance thereof.

ORD. NO. 778 5-2-83
ARTICLE 5. ADMINISTRATION AND AMENDMENT.

Sec. 17-501 RULE EXCEPTIONS. Whenever the tract to be subdivided is of such an unusual size or shape or is surrounded by such development or unusual conditions that the strict application of the requirements contained herein would result in substantial hardship or inequity, the Plan Commission may vary from said requirements of design, but not of procedure or improvements, so that the subdivider may develop his property in a reasonable manner. At the same time, however, there must be a finding of unusual hardship as opposed to the mere granting of privilege so that the public welfare and interest of the City is protected and the general intent and spirit of this Ordinance preserved. Such rule exception shall be recommended to the City Council who must likewise find it acceptable if the final plat is to be finally approved. Such a rule exception shall state the reason for each variation and may be passed by a three-fourths (3/4) vote of the regular membership of the Plan Commission and a majority of the members of the City Council present.

Sec. 17-502 ADMINISTRATION AND AMENDMENT. The City Council may, from time to time, adopt, amend and make public rules and regulations for the administration of these subdivision regulations to the end that the public be informed and that approval of plats be expedited. These regulations may be enlarged or amended by the City Council after public hearing, due notice of which shall be given as required by law, and after recommendation of the Plan Commission.

Sec. 17-503 VALIDITY. If any section, clause, paragraph, provision or portion of these regulations shall be held invalid or unconstitutional by any court of competent jurisdiction, such a holding shall not affect any other section, clause, paragraph, provision or portion of these regulations.
Sec. 17-504 REPEAL. All ordinances or parts of ordinances of the City of Leawood in conflict herewith are hereby repealed, but in no way are deed restrictions affected by these subdivision regulations.

Sec. 17-505 PENALTIES. The violation of any provision of this article is a public offense and any person, firm, association, partnership, or corporation convicted thereof, shall be punished by a fine not to exceed $500.00; and the City shall further have the authority to maintain suits or actions in any court of competent jurisdiction for the purpose of enforcing any provision on this article and to abate nuisances maintained in violation thereof; and in addition to other remedies, institute unjunction, mandamus, or other appropriate action or proceedings to prevent such unlawful erection, construction, reconstruction, alteration, conversion, maintenance, or use, or to correct or abate such violation, or to prevent the occupancy of the building, structure or land. Each day any violation of this article shall continue constitute a separate offense.

Sec. 17-506 CONFLICT WITH PRIVATE COVENANTS. The standards and procedures set out herein shall be held to be the minimum requirements for the promotion and protection of health, safety, morals or general welfare of the public. These regulations shall not annul or abrogate any covenant, restriction or private agreement; however when these regulations impose a higher standard than such covenant, restriction or private agreement, then these regulations shall prevail.

NOW, THEREFORE BE IT ORDAINED BY THE GOVERNING BODY OF THE CITY OF LEAWOOD, KANSAS:

REPEAL OF SECTION. Section 1. Section 29-103 of Revised Ordinances, as adopted by Ordinance No. 738, is hereby repealed and the following enacted in lieu thereof:
ORDINANCE NO. 803
re Leawood Fountain Plaza Project
Industrial Revenue Bonds

29-103. DESCRIPTION AND DETAILS OF THE BONDS, DESIGNATION OF PAYING AGENT. Section 2. Said Industrial Revenue Bonds, Series of April 1, 1982 (The Leawood Fountain Plaza Project), of the City of Leawood, Kansas, shall consist of fully registered bonds without coupons, numbered from 1 consecutively upward in order of issuance, the number of each of such Bonds to be preceded by the letter "R" to identify its registered form. Said Bonds shall be issuable in the denomination of $5,000 or any integral multiple thereof not exceeding, however, the total aggregate amount of principal coming due on the stated maturity date that each particular Bond shall bear, and at no time shall the aggregate principal amount of the Bonds issued and outstanding exceed $7,280,000. All of said Bonds shall be dated April 1, 1982, and said Bonds shall become due and shall mature on January 1, 1985.

The Bonds shall bear interest from their effective dates of registration, respectively, as hereafter provided, at the per annum rate of interest equal to seventy percent (70%) of the Prime Rate (as hereinafter defined) of The First National Bank and Trust Company of Oklahoma City, in the City of Oklahoma City, Oklahoma, which rate shall change from time to time. The term "Prime Rate" shall mean the most recently announced national prime rate of The First National Bank and Trust Company of Oklahoma City, for new ninety (90) day unsecured loans. Such interest shall be payable monthly on the last day of each calendar month during which the Bonds are outstanding and unpaid commencing with the last day of the month of the effective date of registration.

The interest rate on the Bonds will be adjusted throughout the term that the Bonds remain outstanding and unpaid effective on the date of a change in the Prime Rate. In addition, if at any time during which the Bonds remain outstanding and unpaid the marginal income tax rate on which the federal income tax of the holder of the Bonds is based should be less than the rate on which tax was based for the calendar year ending December 31, 1981, resulting from an amendment to the Internal Revenue Code of 1954, as amended, the interest rate on the Bonds shall be increased by an amount sufficient to cause the yield on the Bonds to remain constant. The following formula shall be utilized to establish the adjusted percentage of the Prime Rate (PR) to be applied:

\[
\text{New \% of PR} = \frac{\text{Old \% of PR} - (\text{Old \% of PR} \times \text{New Corporate Tax Rate})}{(1 - \text{Old Corporate Tax Rate})}
\]

If any payment of principal interest or premium on the Bonds or any of them shall not be made on or before the date such payment shall be due and payable under the provisions hereof and the expiration of any applicable grace period, such sums as shall be in default shall bear interest at a rate of interest equal to the effective rate of interest on the Bonds plus three (3) percentage points until paid.
ORDINANCE NO. 803
re Leawood Fountain Plaza Project
Industrial Revenue Bonds

The principal of, redemption premium, if any, and interest on said Bonds shall be payable in any coin or currency of the United States of America which on the respective dates of payment thereof is legal tender for the payment of public and private debts. Payment of such principal and redemption premium, if any, on said Bonds shall be made upon presentation and surrender of such Bonds as they become due at the principal corporate trust offices of The First National Bank and Trust Company of Oklahoma City, in the City of Oklahoma City, Oklahoma, or its successor as fiscal agent, herein sometimes referred to as the "Fiscal Agent". Payment of the interest on each of the Bonds shall be made by the Fiscal Agent on each interest payment date to the person appearing on the registration books of the City hereinafter provided for as the registered owner thereof by check mailed to such registered owner at the address of such registered owner as it appears on the registration books.

In the event any Bonds shall not be presented for payment when the principal thereof becomes due, either at maturity or otherwise, or at the date fixed for redemption thereof, and if funds sufficient to pay such Bonds shall have been made available to the Fiscal Agent, all liability of the City for the payment of such Bonds shall forthwith cease and be completely discharged.

29-103.1. AUTHORITY FOR AMENDMENT; NO REQUIREMENT OF NOTATION ON BONDS.
Section 3. This amendment of the Original Ordinance is made pursuant to the Authority of Section 17 of the Original Ordinance with the express written consent of the Purchaser as holder of all Bonds currently outstanding. In accordance with the provisions of said Section 17 of the Original Ordinance, no notation shall be made on any outstanding Bonds of the amendment provided for by the provisions of this Ordinance, including specifically the extension of the maturity date for said Bonds as provided in Section 2 above, but notwithstanding the foregoing the provisions of the Bonds shall be deemed to be amended consistent with the provisions of this Ordinance.
