Mayor Dunn noted the Planning Commission approved the Final Site Plan for Los Cabos with a vote of 5-1 and asked for comments regarding the dissenting vote.

Community Development Director Richard Coleman stated there was discussion regarding the strand lighting over the patio on the east side. The Leawood Development Ordinance [LDO] states string lighting is prohibited; however, this was inadvertently located under the section of prohibited signs. The majority had approved the lighting since they are free-strung and not located in the street right-of-way.

Mayor Dunn asked if these lights would be off when the restaurant is closed. She was concerned the lighting may affect a neighboring villa.

Bill Brandmeyer, Restaurant Owner, noted this was a Mixed Use District [MXD] and the lights would remain on only during hours of operation and could be controlled by a dimmer switch. The restaurant will open on February 8, 2010, with the patio to open when the weather improves.

A motion to approve the resolution was made by Councilmember Filla; seconded by Councilmember Peppes.

Mr. Brandmeyer confirmed for Councilmember Gill they would have music and speakers outside and it would be played at a neighbor friendly level. They were also considering live acoustic guitar players.

The motion carried following a unanimous vote of 8-0. (Regained teleconference connection with Councilmember Gill).

12. OTHER BUSINESS
   A. Presentation of One Nineteen Transportation Development Sales Tax Analysis conducted by Alvarez and Marsal, pertaining to the One Nineteen Development Project located at 119th Street and Roe Avenue [Project # 80456]

Nancy Zielke, Senior Director for Alvarez & Marsal, gave an updated report of the Sales Tax Analysis pertaining to the One Nineteen Development Project.

The key purpose of the study was to provide the City with an independent analysis. They compared similar types of square footage for similar types of business and inflation. The study was based upon the 13 current retailers, which represents 57% of the occupied space. Information provided from RED Development indicates three additional tenants within the next four months. They studied the potential for additional growth within Leawood and the surrounding area and the Leawood Community exceeds the benchmark for other open lifestyle centers. Projections were based upon information provided from RED.

They compared sales tax trends and found some lag in early remittance, which she noted was common according to the Department of Revenue. Their report currently reflects sales from West Elm, which has closed. Two of the major tenants have generated 66% of the sales. The new 1% Transportation Development District [TDD] sales tax took effect on January 1, 2009, with a sales tax remittance of $253,000. In comparison, the City’s existing sales tax had generated $291,000. Updated January, 2010, results reflected November collections at 98% in comparison to the City’s existing sales tax. This indicates strong improvement of the retailers making the TDD payments.

Updated projections for the 1% sales tax under Scenario A (assuming 57% occupancy over 22 years) should generate $9.5 Million. This includes a non-payment factor of 2%. Under Scenario B (assuming 94% occupancy over 22 years), projections are at $13.5 Million. This is assuming a gradual phase-in of the remaining tenants and includes an average vacancy rate of approximately 6%.
Councilmember Filla temporarily left the meeting.

Ms. Zielke confirmed for Councilmember Azeltine that they are projected to reach 94% occupancy by 2013.

Ms. Zielke confirmed for Councilmember Rasmussen that the 94% projections assumed the leasing of the Dean & Deluca building in the outer years.

Councilmember Filla rejoined the meeting.

Mayor Dunn referred to the average sales per square foot and thought they were anticipating significant growth. Ms. Zielke clarified the current tenant mix has two main retailers and sales per square foot is estimated on the high-end because of their large amount of sales. In comparing Scenario A, it illustrates a profitable center with the existing tenants, whereas, Scenario B assumes full occupancy by 2013.

Councilmember Gill asked if and how they verified their data. Ms. Zielke stated data wasn’t available from the State of Kansas; therefore, they used data from RED. They compared their estimates on sales per square foot with similar types of retailers in the metro, as well as the midwest. Ms. Zielke stated they were very comfortable using the data provided by RED as well as their own comparison analysis.

Ms. Zielke confirmed for Councilmember Gill that they were not able to perform an independent verification of sales tax revenues.

John Klaus, Stifel Nicolaus, stated they reviewed this analysis and felt there was no indication they would need to restructure this bond issue. He reiterated comments that the study was based upon the current tenants under Scenario A. They had to follow two guidelines; level debt service and debt coverage at a minimum of 1.25.

Mr. Klaus clarified for Councilmember Filla that the par amount of the bonds was $3.18 Million. Mr. Lambers stated the interest rate would not be known until the bonds are identified with the buyer. If this increases, it will affect the coverage and this information will be available for the March meeting. Projections are estimated at 8% and it is anticipated this will remain within .25% over the next 30 days. Mr. Klaus clarified that if the interest rate increases, coverage will not be below 1.25.

A motion to accept the One Nineteen Transportation Development Sales Tax Analysis was made by Councilmember Rasmussen; seconded by Councilmember Rawlings. The motion carried following a unanimous vote of 8-0.
