CALL TO ORDER/ROLL CALL:
Hunter, Belzer, Hoyt, Pateidi, Elkins, Strauss, Coleman, Block, Stevens

APPROVAL OF THE AGENDA:

APPROVAL OF MINUTES:
Approval of minutes from the August 28, 2018 Planning Commission meeting.

CONSENT AGENDA:
CASE 110-18 – MHC FINANCIAL SERVICES – WALL SIGN – Request for approval of a Final Sign Plan, located south of College Boulevard and east of Roe Avenue.

NEW BUSINESS:
CASE 105-18 – VILLAGE OF SEVILLE – WINDY CITY BAR & GRILL OUTDOOR PATIOS - Request for approval of a Final Plan – Located north of 133rd Street and west of State Line Road.

CASE 106-18 – INDIAN CREEK ELECTRICAL SUBSTATION – Request for approval of a Final Plan, located south of I-435 and east of Mission Road.

CASE 107-18 – BARSTOW SCHOOL – LEAWOOD CAMPUS – Request for approval of a Preliminary Plan and Special Use Permit, located north of 123rd Street and west of State Line Road. PUBLIC HEARING

Case 97-18 – LEAWOOD DEVELOPMENT ORDINANCE AMENDMENT TO SECTION 16-9-26(a), AUTOMATED BANK TELLER – ANCILLARY TO BANK OR FINANCIAL SERVICE – Request for approval of an addition to the Leawood Development Ordinance, pertaining to automated bank teller machines – ancillary to a bank of financial service. PUBLIC HEARING

CASE 98-18 – LEAWOOD DEVELOPMENT ORDINANCE AMENDMENT TO SECTION 16-9-26(b), AUTOMATED BANK TELLER – NON-ANCILLARY IN-WALL – Request for approval of an addition to the Leawood Development Ordinance, pertaining to automated bank teller machines – non-ancillary in wall. PUBLIC HEARING

CASE 99-18 – LEAWOOD DEVELOPMENT ORDINANCE AMENDMENT TO SECTION 16-2-7, TABLE OF USES – Request for approval of an amendment to the Leawood Development Ordinance, pertaining to changes to bank teller machines. PUBLIC HEARING
CASE 113-18 – LEAWOOD DEVELOPMENT ORDINANCE AMENDMENT TO SECTION 16-2-5.3, R-1
(PLANNED SINGLE FAMILY LOW DENSITY RESIDENTIAL DISTRICT)(15,000 SQ. FEET PER DWELLING) –
Request for approval of an amendment to the Leawood Development Ordinance, pertaining to exceptions to
side yard setbacks.  PUBLIC HEARING

ADJOURN REGULAR MEETING:
Meetings will end at 9:00 p.m. unless the Commission votes to extend the meeting for a period of thirty (30)
minutes. An additional thirty (30) minute extension, for a maximum of two (2) extensions, may be voted by the
Commission members.

LEAWOOD PLANNING COMMISSION

The Leawood Planning Commission is a nine member non-partisan body whose members are appointed by the
Mayor and confirmed by the Governing Body.

The Planning Commission prepares the Comprehensive Plan that is used as a general guide for the development of the community. The Comprehensive Plan is reviewed and updated annually as part of the commission’s ongoing process of evaluating trends and patterns. The Commission also reviews all zoning, special use
permit, and site plan and plat applications prior to making recommendations to the governing body for final action.

The regular scheduled public meetings of the Planning Commission are held at 6:00 PM on the fourth Tuesday of each month in the City Council chambers, 4800 Town Center Drive. The Commission may also conduct a study session followed by a meeting on the second Tuesday of each month.

Anyone wishing to appear on the Planning Commission agenda or study session agenda should contact Planning Services at (913) 339-6700.

REZONING AND SPECIAL USE PERMIT PROCEDURES FOR LEAWOOD, KANSAS

Newspaper publications: The city will be responsible for publishing the notice of public hearing in the official City newspaper not less than 20 days prior to the end of the public hearing.

Posting of the sign: Upon submission of the application, the City will supply the applicant with a sign to be posted on the property. The sign must be posted not less than 20 days prior to the public hearing.

Letters of notification: The applicant will be responsible for mailing notices by certified mail, return receipt requested, of the proposed zoning change to all land owners located within 200 feet of the area proposed to be altered. These notices must be sent a minimum of 20 days prior to the Planning Commission hearing.

Public hearing: The Planning Commission hears all zoning requests, hearing from the applicant and anyone in the audience wishing to speak for or against the proposal. The Commission will then make a recommendation for approval or denial to the City Council or continue the application to another Planning Commission agenda. The following is an outline of the public hearing process.

1. Staff summarization of comments and recommendations.
2. Applicant presentation and response to staff comments and recommendations.
3. Public Hearing
   a. Anyone wishing to speak, either in favor or in opposition has an opportunity to speak.
   b. It is appreciated if the speakers keep repetition to a minimum.
4. The applicant will have an opportunity to respond to points raised during the hearing.
5. Planning Commission discussion.
6. Motion and second by the Planning Commission.
7. Planning Commission discussion of motion.
8. Planning Commission vote on the motion.

Protest period: Certain property owners may file a petition protesting the application within 14 days after the close of the Planning Commission public hearing. The petition must be signed by the owners of record of 20% or more of any real property proposed to be rezoned, or by the owners of record of 20% or more of the total real
property within the area required to be notified in Article 16-5-4.1 of the proposed zoning of specific property, excluding streets and public ways and property excluded pursuant to 16-5-4.3.

City Council Action: After the protest period has concluded, the application will be placed on an agenda for a City Council meeting. The Council may then take action on the proposal. The Council may approve the Planning Commission’s recommendation, or it may amend and approve or remand the proposal to the Planning Commission for further consideration.
CALL TO ORDER/ROLL CALL: Hunter, Belzer, Hoyt, Pateidl, Elkins, Strauss, Coleman, Block, and Stevens

Chairman Elkins: Chair would note for the record that we welcome Commissioner Mandy Hunter, who is joining us for the first time formally tonight. Welcome to the commission.

Comm. Hunter: Thank you.

Chairman Elkins: Ms. Hunter’s appointment by the Mayor was approved by Governing Body on July 16th, and she has taken the Oath of Office and is properly seated with the commission. With that, we’ll move on to the agenda. There is a new agenda. Mr. Klein, do you care to enlighten us as to the difference?

APPROVAL OF THE AGENDA

Mr. Klein: The difference is that there were 3 LDO amendments regarding the automatic bank teller machines. We pulled those off for notification purposes. You will probably see those in the next Planning Commission meeting. The revised agenda was posted on the Internet as soon as it was made.

Chairman Elkins: Are there any additional questions or revisions?

A motion to approve the agenda was made by Hoyt; seconded by Pateidl. Motion carried with a unanimous vote of 8-0. For: Hunter, Belzer, Hoyt, Pateidl, Strauss, Coleman, Block, and Stevens.

APPROVAL OF MINUTES: Approval of the minutes from the July 24, 2018 Planning Commission meeting and the August 14, 2018 Planning Commission work session.

A motion to approve the minutes from the July 24, 2018 Planning Commission meeting was made by Hoyt; seconded by Belzer. Motion carried with a unanimous vote of 8-0. For: Hunter, Belzer, Hoyt, Pateidl, Strauss, Coleman, Block, and Stevens.
Chairman Elkins: Are there any revisions or corrections to the August 14, 2018 minutes?

Comm. Coleman: On Page 2 near the bottom, instead of Mr. Coleman, it should be Commissioner Coleman.

Comm. Block: On Page 12, the second entry should be attributed to Commissioner Coleman, and then on the same page, the next 2 entries attributed to Mr. Block should be Commissioner Block.

A motion to approve the revised minutes from the August 14, 2018 Planning Commission work session was made by Belzer; seconded by Coleman. Motion carried with a unanimous vote of 8-0. For: Hunter, Belzer, Hoyt, Pateidl, Strauss, Coleman, Block, and Stevens.

CONTINUED TO THE SEPTEMBER 11, 2018 PLANNING COMMISSION MEETING:
CASE 71-18 – 135th STREET AND KENNETH ROAD – MIXED USE AND MEDIUM DENSITY RESIDENTIAL – Request for approval of a Rezoning from AG (Agricultural) to MXD (Mixed Use Development) and RP-3 (Planned Cluster Attached Residential District), Special Use Permit for an Assisted Living Facility, Preliminary Plan, and Preliminary Plat, located south of 135th Street and west of Kenneth Road. PUBLIC HEARING

NEW BUSINESS:
CASE 100-18 – LEAWOOD PUBLIC WORKS MAINTENANCE FACILITY EXPANSION – Request for approval of a Revised Preliminary Plan, Revised Final Plan, and Revised Final Plat, located south of 143rd Street and east of Kenneth Road. PUBLIC HEARING

Staff Presentation:
City Planner Ricky Sanchez made the following presentation:

Mr. Sanchez: This is Case 100-18 – Leawood Public Works Maintenance Facility Expansion – Request for approval of a Preliminary Plan, Final Plan, and Final Plat. The property is located south of 143rd Street and east of Kenneth Road. The applicant is proposing the merging of five separate lots and previously dedicated right-of-way into a single lot. Also with this application is a 3,911’ expansion of the existing maintenance facility to add two additional maintenance bays, the relocation of an oil/sand separator, and the striping of 22 parking spaces, two of which will be ADA compliant. The new plan is proposing two maintenance bays that will connect to the east of the existing structure. The oil/sand separator will be just east of the new expansion. Along with the expansion and relocation of the separator, the plan calls for 20 parking spaces to be striped at the eastern portion of the maintenance facility location. This area is
currently used as extra parking for the maintenance facility; however, it was never formally striped to do so, and that is what they are asking to do with this application. There will also be an addition of two ADA spaces along the west side of the existing maintenance facility. Just north of the proposed formal parking spaces will be a drive used to connect the eastern portion of the lot that will be used to access an existing milling area that is used for storage currently. This project meets all regulations per the Leawood Development Ordinance, and staff recommends approval of Case 100-18 with the stipulations in the Staff Report.

Chairman Elkins: Questions for Mr. Sanchez? Seeing none, I would look to the applicant.

Applicant Presentation:
David Ley, Director of Leawood Public Works, appeared before the Planning Commission and made the following comments:

Mr. Ley: I’ll have the architect give a presentation shortly, but I just want to state that we are in agreement with all the stipulations.

Lonnie Shanks, 15105 Jowler Creek Road, Camden Pointe, MO, appeared before the Planning Commission and made the following comments:

Mr. Shanks: He did such a good job of describing the project that he leaves very little for me to walk you through, but I have it on the screen for you to see it. As he described, it’s a two-bay addition to your current public maintenance facility to the east. All the color and material will match the existing building exactly. We will relay KB interceptor from its current location to the east of the facility to about 20’ farther east to the new addition. There will be new parking added, and the grading wall will be redone so it will all flow into the caption basin as before. I also believe that the lighting around the building will be changed to all LED while we’re there. All the lights have full cutoff, so they will not pour light onto the neighboring properties. That also goes with the light poles. That is really it.

Chairman Elkins: Any questions for Mr. Shank?

Comm. Strauss: Is any of this property in the floodplain?

Mr. Ley: A portion of the floodplain is where the creek is, so it’s not on the buildings, but it is contained within the creek.

Comm. Stevens: You mentioned replacement of the new pole lights as well as replacing fixtures from the existing pole lights.

Mr. Shanks: There will be new pole lights on the east addition where the new parking is going to go. Those light heads will match the new light heads on the building.
Comm. Stevens: It looks like the stormwater for this new work, including the roofing, the new addition, and all the paved area is sheet drainage off the site to the northeast in the gravel drive area and to the south into the right-of-way of the property along Overland Park. Has there been a drainage study or engineering as part of that?

Mr. Ley: We do have existing Best Management Practices (BMPs) onsite. The north half of that new parking lot will actually drain north and then west into an inlet that gets captured, and then it treats the stormwater before discharging into the creek. On the southeast corner, it’s going to drain into an open channel that will be vegetation.

Comm. Stevens: The curb cut is not there connecting the gravel area.

Mr. Ley: Where it’s going from the parking lot to the storage area is a high point. The parking lot will drain west from that point.

Mr. Shanks: That part of the site actually is going to have the grade adjusted so more of the water will go into it.

Comm. Stevens: It looked like it was aimed toward that. As part of the stipulations, I noticed that, other than the KCP&L power lines, all the powers lines are to be buried within the property, but yet, there was discussion of the power line along Kenneth Road as a future project with Kenneth Road widening.

Mr. Ley: That is correct. When we do the widening along Kenneth Road, we will bury those power lines. Currently, we’re going to be burying the power lines north of our property line along Kenneth Road up to 143rd Street and then all of 143rd Street with the 143rd Street project. The portion that is adjacent to our public works facility will be completed when Kenneth Road is widened.

Comm. Stevens: Is it in the right-of-way of Kenneth Road?

Mr. Ley: It is in the right-of-way.

Chairman Elkins: When is the Kenneth Road expansion scheduled?

Mr. Ley: It’s probably going to be about 15 years. There are a couple of phases of Mission Road that come up first, and then we’ll do 151st. Then, we’ll come back around to Kenneth Road.

Chairman Elkins: It will be a while before those power lines get buried.
Mr. Ley: When we bury them, they will move to the west side of the street because there’s a main gas line on the east side, and we can’t bury the power lines within their easement.

Chairman Elkins: Additional questions for the applicant? With respect to this burying of the power lines, is the city looking for any treatment different than if we had a similar situation with a private developer making improvements to their property?

Mr. Coleman: In cases where there is just a small portion of overhead power lines on an arterial that we would normally want buried, we would often have a letter from the applicant saying they don’t oppose a Benefit District in the future. The burial is when we are able to get all of them. In this case, since we already own the property and we’ll be doing the work in the future, it’s probably not necessary. We will bury them at that point.

Chairman Elkins: What about the treatment in terms of timing and whatnot?

Mr. Coleman: The treatment is the same.

Chairman Elkins: Other questions for the applicant? Because this is a request for a Plat, it requires a Public Hearing.

Public Hearing

As no one was present to speak, a motion to close the Public Hearing was made by Strauss; seconded by Coleman. Motion carried with a unanimous vote of 8-0. For: Hunter, Belzer, Hoyt, Pateidl, Strauss, Coleman, Block, and Stevens.

Chairman Elkins: That takes us to a discussion with respect to this application. Any comments from the commission with respect to Case 100-18? If not, a motion may be in order.

A motion to recommend approval of CASE 100-18 – LEAWOOD PUBLIC WORKS MAINTENANCE FACILITY EXPANSION – Request for approval of a Revised Preliminary Plan, Revised Final Plan, and Revised Final Plat, located south of 143rd Street and east of Kenneth Road – including 16 Staff Stipulations – was made by Hoyt; seconded by Strauss. Motion carried with a unanimous vote of 8-0. For: Hunter, Belzer, Hoyt, Pateidl, Strauss, Coleman, Block, and Stevens.

CASE 109-18 – LEAWOOD DEVELOPMENT ORDINANCE AMENDMENT TO SECTION 16-9-193, OFFICE, GENERAL – Request for approval of an amendment to the Leawood Development Ordinance, pertaining to wholesale establishments without on-site inventory. PUBLIC HEARING
Staff Presentation:
Assistant Director Mark Klein made the following presentation:

Mr. Klein: This is Case 109-18 – Leawood Development Ordinance Amendment to Section 16-9-193, Office, General. This amendment has to do with wholesale that does not have onsite inventory. This is a subject that we covered at the August 14th work session as well. The city has been approached by a number of businesses lately that do most of their transactions over the phone or Internet. There really is no onsite inventory to speak of. It operates exactly as an office would. Currently, wholesale is limited to the Business Park (BP) district. In order to recognize the difference in impact between these two types of uses, it would be more appropriate to allow it under General Office, which would be allowed in SD-CR, SD-O, SD-NCR2, and SD-NCR. Staff is recommending approval of this amendment, and I'll be happy to answer any questions.

Chairman Elkins: Questions for Mr. Klein?

Comm. Coleman: What happens if someone works out of his home? How does that work with the ordinance?

Mr. Klein: The city actually has an ordinance with regard to home occupations. There are certain restrictions they must follow in order to be considered a home occupation. They can't have deliveries that would be beyond what the normal single-family house would have. They wouldn't be allowed to have signage. The uses are limited. As long as it fits within these criteria, it would be allowed to operate.

Chairman Elkins: Additional questions? Because this is an amendment to the LDO, I would open the Public Hearing.

Public Hearing

As no one was present to speak, a motion to close the Public Hearing was made by Coleman; seconded by Belzer. Motion carried with a unanimous vote of 8-0. For: Hunter, Belzer, Hoyt, Pateidl, Strauss, Coleman, Block, and Stevens.

Chairman Elkins: That takes us to a discussion of the proposed amendment to the Leawood Development Ordinance Amendment, Section 16-9-193. Are there any comments? If none, I would entertain a motion.

A motion to recommend approval of CASE 109-18 – LEAWOOD DEVELOPMENT ORDINANCE AMENDMENT TO SECTION 16-9-193, OFFICE, GENERAL – Request for approval of an amendment to the Leawood Development Ordinance, pertaining to wholesale establishments without
on-site inventory – was made by Hoyt; seconded by Belzer. Motion carried with a unanimous vote of 8-0. For: Hunter, Belzer, Hoyt, Pateidl, Strauss, Coleman, Block, and Stevens.

MEETING ADJOURNED
City of Leawood Planning Commission Staff Report

MEETING DATE: September 25, 2018
REPORT WRITTEN: September 19, 2018

MHC FINANCIAL SERVICES – WALL SIGN– REQUEST FOR APPROVAL OF A FINAL SIGN PLAN – Located south of College Boulevard and east of Roe Avenue – Case 110-18 **Consent Agenda**

STAFF RECOMMENDATION:
Staff recommends approval of Case 110-18, MHC Financial Services, with the stipulations stated in the staff report.

APPLICANT:
• The applicant is Vanessa Harbrucker with Acme Sign, Inc.
• The property is owned by Leawood Executive Properties
• The property is managed by Leawood Executive Management, LLC.

REQUEST:
• The applicant is requesting approval of a Final Sign Plan for a wall sign for MHC Financial Services.

ZONING:
• The property is currently zoned SD-O (Planned Office).

COMPREHENSIVE PLAN:
• The Comprehensive Plan designates this property as Office.

LOCATION:
SURROUNDING ZONING:

- **North**: Directly north across College Boulevard is the Fox Hill Office Park within the city of Overland Park.
- **South**: Directly south is the residential subdivision Huntington Farms, zoned RP-4, Planned Cluster Residential – Previous Leawood Development Ordinance.
- **East**: Directly east is the residential subdivision Huntington Farms, zoned RP-4, Planned Cluster Residential from the previous Leawood Development Ordinance.
- **West**: Directly west is a neighboring office building still within the Leawood Executive Centre zoned SD-O (Planned Office)

SIGNAGE:

- The applicant is proposing to install a wall sign that faces north that reads “MHC Financial”.
- The sign will be a total of 83.48 sq. ft. and will take up 4.56% of the façade.
- The sign will be located on the top-left corner of the most easterly portion of the building, facing north and will be 36” away from the edge of the building.
- The proposed sign measures 17’ 1½” in length and 4’ 10 ½” in height. The letters will have 3 ½” returns.
- The proposed sign will consist of individually mounted, halo illuminated reverse channel letters with faces and returns to be painted “Map Brushed Aluminum”. The illumination of the sign will be a white LED Halo Illumination.
- An existing wall sign is located on the north side of the northern portion of the same building reading “MANILDRA GROUP USA”. Per the Leawood Development Ordinance Section 16-4-6.13 Permanent Sign Regulations: Signs permitted in SD-O Districts are to have a total maximum of two wall signs, must have a maximum area of 5% of the building façade (not to exceed a total of 200 sq. ft.), and are allowed lighting that is halo-illuminated, externally illuminated, or non-illuminated.
- Per the Leawood Development Ordinance Section 16-4-6.10(C), General Regulations: Signage and building addresses on the facades of buildings shall be individual cast letters that reflect the style of the building. Metal lettering is encouraged. Anchor tenants shall have signage heights reviewed on an individual basis. Signage for remaining tenants shall be limited to 18 inches in height and placed on a recessed surface of the building. Signage color will be limited to one color per building or building group.

STAFF RECOMMENDATION:

Staff recommends the Planning Commission approve Case 110-18, MHC Financial Services – Final Sign Plan, with the following stipulations:

1. The approval shall be limited to the installation of one wall sign.
2. A sign permit from the Planning Department shall be obtained prior to installation of the signs.
3. In addition to the stipulations listed in this report, the developer/property owner agrees to abide by all ordinances of the City of Leawood including the Leawood Development Ordinance, unless a deviation has been granted, and to execute a statement acknowledging in writing that they agree to stipulations one through three.

City of Leawood Planning Commission Staff Report

MEETING DATE: September 25, 2018
REPORT WRITTEN: September 14, 2018

VILLAGE OF SEVILLE – WINDY CITY PUB OUTDOOR PATIOS – REQUEST FOR APPROVAL OF A FINAL PLAN – Located north of 133rd Street and west of State Line Road – Case 105-18

STAFF RECOMMENDATION:
Staff recommends approval of Case 105-18, Village of Seville – Windy City Pub outdoor patios – request for approval of a Final Plan, with the stipulations outlined in the staff report.

APPLICANT:
- The applicant is Gary Withers with Windy City Pub.
- The property is owned by Gary Withers.
- The architect is John Davidson with Davidson Architecture & Engineering.

REQUEST:
- The applicant is requesting approval of a Final Plan for the addition of two patio spaces on the exterior of the Windy City Pub – one 18 seat patio (6 tables) on the east side (front) of the building, and one 18 seat patio (6 tables) on the south side of the building.
- The applicant is requesting to enclose three sides of each patio with a 4’ aluminum fence.
- No other changes are proposed with this application.

ZONING:
- The property is currently zoned SD-CR (Planned General Retail).

COMPREHENSIVE PLAN:
- The Comprehensive Plan designates this property as Retail.

LOCATION:
SURROUNDING ZONING:

- **North**  Adjacent to the north property line of the Village of Seville are the Leawood South Townhomes, zoned RP-4 (Planned Cluster Residential under a previous version of the Leawood Development Ordinance) and Leawood Square, a commercial development zoned SD-CR (Planned Commercial Retail).
- **South**  Adjoining the south property line of the Village of Seville is 133rd Street. On the south side of 133rd Street is vacant land (formerly used as an airport) zoned SD-CR.
- **East**  State Line Road is adjacent to the east property line. On the east side of State Line Road is commercial development within Kansas City, Missouri.
- **West**  Directly to the west of Village of Seville is the Enclave at Cedar Point, Zoned RP-2 (Planned Cluster Detached Residential District) and Greenbrier of Leawood, a single-family subdivision zoned R-1 (Planned Single-family Low Density Residential).

SITE PLAN:

- The tenant space is currently occupied by Windy City Pub.
- The tenant space is located on the west side of the development, on the southern corner of the main retail building within the center.
- The main entrance of Windy City Pub is oriented to the east, along with the other tenant spaces within the main center.
- The front door entrance to Windy City Pub is covered by a portico extending to the front sidewalk.
- Planting beds and decorative pavers exist on the eastern façade of the building.
- Head-in parking spaces exist directly in front of Windy City Pub. The vehicles are separated from the proposed patio fence by a 7 foot sidewalk. The sidewalk provides access to the storefronites of the main center on the east side of the building. Pedestrian crossings provide connections to a pad site to the south (along the north side of 133rd Street).

**Eastern Patio**

- A fenced, outdoor patio is proposed to the north of the main entrance of the restaurant (eastern façade) to be located on existing concrete in front of the building. A 4’ black aluminum fence will enclose the patio on the southern, eastern and northern sides.
- The eastern patio is approximately 15’ in width and 39’ in length and can be accessed through an exterior patio gate, located on the southern end in close proximity to the doorway, and by an interior door of the restaurant.
- On the eastern patio, three new 3’-6” tall x 2’-2” wide pilasters will anchor the new fence. The pilasters will be faced with tan colored natural stone to match the existing façade, and will be capped with cast stone to match the existing center.
- The patio will maintain the minimum walkway width required by the Americans with Disabilities Act (ADA).

**Southern Patio**

- A fenced outdoor patio is also proposed on the southern side of the building, and will require a new 4” concrete slab on a rock base. The new concrete slab will directly abut the adjacent curb. A 4’ black aluminum fence will enclose the patio on the eastern, southern and western sides. The fence will be located approximately 1’ from the adjacent curb.
• The southern patio is approximately 8'-6" in width and 26'-9" in length. The southern patio is accessed through an exterior patio gate, located on the eastern end of the patio in close proximity to the doors, and does not have a direct interior doorway access within the gated area.

• On the southern patio, two new 3'-6" tall x 2'-2" wide pilasters will be located at each end of the patio to anchor the new fence. The pilasters will be faced with tan colored natural stone to match the existing façade, and will be capped with cast stone to match the existing center.

• An existing light pole, to remain, is located on the eastern end of the southern patio, outside of the fenced patio area.

• The patio will maintain the minimum walkway width required by the Americans with Disabilities Act (ADA).

ELEVATIONS:
• An existing red awning and row of windows are located on the southern façade, within the proposed patio space.

• A storefront window system is located on the eastern façade, within the proposed patio space.

• The applicant is not proposing changes to the façade of the tenant space.

Existing Eastern Façade

Existing Southern Façade

Patio Furnishings:
• Each patio area will seat up to 18 patrons at six tables.

• The patio furniture will consist of steel finished, round and rectangular metal tables and chairs in charcoal. Both high-top and standard tables are proposed.

• The chairs will be stackable.

• No outdoor heaters are proposed.

SIGNAGE:
• No signage is proposed with this project.

LANDSCAPING:
• Existing planters are located on the eastern façade, and will remain as existing.
• Three ornamental trees are located on the south side of the building, between the curb and the façade. The ornamental trees will be removed and relocated further west, on the same side of the building.

LIGHTING:
• There are no proposed changes to lighting.

STAFF COMMENTS:
• Staff has concerns about food and drink being served through the main entrance of the pub for the south patio. If it is determined by ABC (Alcohol Beverage Control) that alcohol cannot be served outside of a controlled area, such as the front door, an interior entrance from the restaurant to the patio will have to be provided or alcohol will not be able to be served.
• With the construction of the patio on the south side of the building, the potential for a future sidewalk connection to the west might be lost.

STAFF RECOMMENDATION:
Staff recommends the Planning Commission approve Case 105-18, Windy City Pub outdoor patios within Village of Seville – request for approval of a Final Plan, with the following stipulations:
1. The project is limited to the construction of two fenced patio spaces at the Windy City Pub in the Village of Seville, to be located on the eastern and southern building facades.
2. The project shall comply with the design guidelines for Village of Seville.
3. Patio pilasters shall be faced with natural stone material to match the existing stone in the Village of Seville.
4. The patios shall maintain the minimum walkway widths required by the American’s with Disabilities Act.
5. Development rights under this approval shall vest in accordance with K.S.A. 12-764.
6. In addition to the stipulations listed in this report, the developer/property owner agrees to abide by all ordinances of the City of Leawood including the Leawood Development Ordinance, unless a deviation has been granted, and to execute a statement acknowledging in writing that they agree to stipulations one through six.

ITEM 1 - BAR STOOL (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2550300-04 Dimensions: 43(h) x 19(w) x 22(d)
Topeka Bar Stool, stackable, armless, designed for outdoor/indoor use, solid back & mesh seat, footrest, tubular steel frame, charcoal finish
1 ea 3 year limited warranty on frame
CLOSEOUT ITEM

ITEM 2 - CHAIR (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2551100-0450 Dimensions: 32(h) x 21(w) x 22(d)
Topeka Dining Arm Chair, stackable, designed for outdoor/indoor use, solid back & mesh seat, tubular steel frame, charcoal finish (to be discontinued, contact factory for availability)
1 ea 3 year limited warranty on frame
CLOSEOUT ITEM

ITEM 3 - SPARE NO.

ITEM 4 - SPARE NO.

ITEM 5 - METAL TABLE TOP (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2203000-01 Dimensions: 30(w)
Table Top, 30" dia., round, micromesh, with umbrella hole, designed for outdoor/indoor use, 16 gauge steel, powder coated finish (base sold separately)
1 ea 3 year limited warranty
1 ea Model 50 Charcoal
ITEM 6 - METAL TABLE TOP (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2203030-01 Dimensions: 30(w) x 30(d)
Table Top, 30" x 30", square, micromesh, with umbrella hole, designed for outdoor/indoor use, 16 gauge steel, powder coated finish (base sold separately)
1 ea 3 year limited warranty
1 ea Model 50 Charcoal

ITEM 7 - METAL TABLE BASE (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2342700-01 Dimensions: 29(h) x 28(w)
Café Table Base, dining height, 28" dia. spread, butterfly legs, 16 gauge steel, powder coated finish (to be used with 32" or smaller table tops)
1 ea 3 year limited warranty on frame
1 ea Model 50 Charcoal

ITEM 8 - METAL TABLE BASE (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2345700-01 Dimensions: 39(h) x 28(w)
Butterfly Bar Table Base, bar height, 28" dia. spread, round, 16 gauge steel, powder coated finish (to be used with 32" or smaller table tops)
1 ea 3 year limited warranty on frame
1 ea Model 50 Charcoal

ITEM 9 - METAL TABLE TOP (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2203600-01 Dimensions: 36(w)
Table Top, 36" dia., round, micromesh, with umbrella hole, designed for outdoor/indoor use, 16 gauge steel, powder coated finish (base sold separately)
1 ea 3 year limited warranty
1 ea Model 50 Charcoal

ITEM 10 - METAL TABLE TOP (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2203636-01 Dimensions: 36(w) x 36(d)
Table Top, 36" x 36", square, micromesh, with umbrella hole, designed for outdoor/indoor use, 16 gauge steel, powder coated finish (base sold separately)
1 ea 3 year limited warranty
1 ea Model 50 Charcoal

ITEM 11 - METAL TABLE BASE (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2343700-01 Dimensions: 29(h) x 32(w)
Café Table Base, dining height, 32" dia. spread, butterfly legs, 16 gauge steel, powder coated finish (to be used with 36" or larger table tops)
1 ea 3 year limited warranty on frame
1 ea Model 50 Charcoal

ITEM 12 - METAL TABLE BASE (1 REQ'D)
Plantation Prestige Commercial Furniture LLC Model 2344700-01 Dimensions: 39(h) x 32(w)
Butterfly Bar Table Base, bar height, 32" dia. spread, 16 gauge steel, powder coated finish (to be used with 36" or larger table tops)
1 ea 3 year limited warranty on frame
1 ea Model 50 Charcoal
ININDIAN CREEK SUBSTATION - REQUEST FOR A FINAL PLAN - Located south of I-435 and east of Mission Road. Case 106-18

STAFF RECOMMENDATION:
Staff recommends approval of Case 106-18, Indian Creek Substation – Request for a Final Plan with the stipulations stated in the staff report.

APPLICANT:
- The property is owned by Johnson County Wastewater and the City of Leawood.
- The contact is Chris Koch with KCP&L
- The engineer is John Keller with Black & Veatch Corporation.
- The landscape architect is Troy Henningson, PLA with HDR.

REQUEST:
- This is a request for approval of Final Plan for a KCP&L Electrical Substation to be located within the Johnson County Wastewater Treatment Facility, south of I-435 and east of Mission Road.

ZONING:
- The property is currently zoned AG (Agricultural District).

COMPREHENSIVE PLAN:
- The Comprehensive Plan designates this property as Public.

SURROUNDING ZONING:
- North To the north of the site is Lee Boulevard and I-435. Beyond I-435 is Mission Farms, a mixed use development, zoned MXD (Mixed Use Development District) and the single family residential subdivision of Leawood Estates, zoned R-1 (Planned Single Family Low Density Residential District).
- South To the south of the subject site is Indian Creek, the confluence of Indian Creek and Tomahawk Creek, and property owned by the City of Leawood, zoned REC (Planned Recreation).
- East To the east is Leawood City Park, zoned REC (Planned Recreation).
- West To the west is additional property for Leawood City Park, zoned REC (Planned Recreation). Beyond Leawood City Park is Mission Road and the single-family residential subdivision of Longwood Forest, zoned R-1 (Planned Single Family Low Density Residential District) and vacant land located within the City of Overland Park, Kansas.
LOCATION:

```
[Image: Location diagram of Johnson County Wastewater Treatment Plant with highlighted KCP&L Electrical Substation]
```

SITE PLAN COMMENTS:

**Electrical Substation:**

- The Governing Body approved an expansion to the Johnson County Wastewater Treatment Plant with Case 03-18, Johnson County Wastewater Treatment Facility Expansion, on March 5, 2018 (Resolution 4896). The site layout provided with that application showed a KCP&L Electrical Substation located in the northeastern quadrant of the project, directly west of Indian Creek.
- The Governing Body approved a special use permit for a public utility/electrical substation, and preliminary plan with Case 124-17, Johnson County Wastewater – KCP&L Electrical Substation, on January 2, 2018 (Ordinance 2874).
- This application is for a Final Plan for the electrical substation operated by KCP&L, along with the overhead power lines associated with the substation.
- No changes are proposed to the remainder of the site layout that was approved with Case 03-18, Johnson County Wastewater Treatment Facility Expansion.
- The KCP&L electrical substation is proposed to be located in the northeastern quadrant of the Johnson County Wastewater Treatment Facility at the northern end of the former detention basin that is being removed. Indian Creek is directly to the east and south, Lee Boulevard is to the north and the remainder of the Johnson County Wastewater Treatment Plant is to the west.
- The KCP&L electrical substation site is generally rectangular and is approximately 340’ X 200’.
- The surfacing of the substation will be crushed rock.
- The applicant is proposing an 8’ tall chain link fence around the perimeter of the substation.
- Ten 18’ pole mounted light fixtures will be provided around the perimeter of the electrical substation within the perimeter fence.
- The substation will be accessed by two gates on the west side of the compound. One gate is located at the northwest corner and the other at the southwest corner. Each gate is 20’ in width.
- Johnson County Wastewater will construct a 6’ chain link security fence with three strands of barbed wire along the top. Within this security fence constructed by Johnson County Wastewater, KCP&L will construct an 8’ chain link fence with no barbed wire for the substation.
- Within the substation will be a variety of electrical structures that will range in height between approximately 11’ and 90’. In conjunction with the substation, two transmission poles are proposed ranging in height between 100’ to 110’. The following table describes the structure types within the substation.

<table>
<thead>
<tr>

This image shows the locations of the substation in a red outline, two Transmission Poles in red (100’ and 110’), two Substation Dead End Structures in yellow (90’), and the Lighting Shielding Mast in green (90’).

Modifications to Overhead Utilities:
- There are existing electrical transmission lines that run east-west on the south side of Lee Blvd. The applicant is proposing to realign the transmission lines that are directly north of where the electrical substation will be located, to angle to them south at the northeast and northwest corners of the electrical substation to connect with the substation.
  - The new alignment to enter the electrical substation from the northeast will be accomplished by removing an existing three pole transmission structure that is on property owned by the
City of Leawood, and replacing it with a new transmission pole (110’ in height) further to the west on land owned by Johnson County Wastewater. The new transmission pole will be approximately 25’ from Johnson County Wastewater’s east property line and in line with the existing transmission lines. The transmission lines from this pole will then angle to the southwest to connect to a new transmission pole (90’) that will be within the northeast corner of the new electrical substation.

- The new alignment to enter the electrical substation from the northwest will be done by adding a new transmission pole (100’ in height) to the east and in line with an existing three pole transmission structure on Johnson County Wastewater property to remain. The transmission lines from the new pole will then angle to the southeast to connect with a new transmission pole (90’) within the northwest corner of the new substation.

**BULK REGULATIONS:**

- Per Section 16-2-4.7, Structures Permitted above the Height Limits, buildings and structures constructed for the purpose of public uses, government uses, or public utility facilities, may exceed the height limitations of the district. However, no portion of any structure may be erected to a height exceeding 75’ without approval of the Governing Body incorporated in the conditions of an approved Development Plan. The Governing Body approved the maximum height to exceed 75’ to a maximum of 110’ (Ord. 2874). Unless otherwise provided for in an approved Development Plan, any increase in the permitted height of any such structure above the height allowed herein, or in such district regulations shall require at least one additional foot of setback space on all sides for each additional foot by which such building or structure exceeds such height limit. Several of the structures associated with the electrical substation are 90’ or above in height and have received Governing Body approval to exceed 75’ in height. The maximum height within the AG District is 35’. With the exception of one transmission pole that is 110’ in height within the northeast corner of the site, the applicant is providing one additional foot of setback for each foot that the structures exceed the height limitation of 35’.

- Per Section 16-1-4, Public Utilities and Public Safety Uses, poles and wires or any similar equipment for transmission distribution to customers of electricity, that otherwise meet the terms and requirements of the Leawood Development Ordinance may be placed in rear and side setbacks when such structures have been reviewed and approved by the Director of Planning and Development as being in compliance with the Leawood Development Ordinance.

- The following table outlines the required and provided regulations for the project:

</tbody>
</table>

*Approved by the Governing Body during the preliminary phase of the project (Ord. 2874).
PARKING:
- After the installation of the substation, it will not be manned and no permanent parking spaces are proposed. Inspection of the facility takes place annually to bi-annually. The only other times that the substation will have people on site is during maintenance, construction and vegetation management.

ELEVATIONS:
- The fence around the perimeter of the electrical substation is proposed to be an 8’ chain link metal fence with a 3/8” security fabric.
- The electrical structures within the substation will be constructed of galvanized metal and will vary in height between 11’ and 90’.

LANDSCAPING:
- A final landscape plan was submitted as part of the Johnson County Waste Water Treatment Facility final plan for the entirety of the area. The submitted landscape plan matches that of which was approved by Governing Body on March 5, 2018 (Resolution 4896).
- The proposed landscape plan calls for six Norway Spruce Trees to be placed along the east side of the substation, outside of the 6’ tall fence.
- The proposed landscape plan also calls for eight Canaertii Red Cedar evergreen trees, also to be placed outside of the 6’ tall exterior fence.

LIGHTING:
- A photometric study and cut sheets for new lighting fixtures have been submitted with this application.
- A photometric study was submitted as part of the Johnson County Waste Water Treatment Facility project in 2017. This application falls within the area of the previously approved photometric study and meets the requirements of the Leawood Development Ordinance.
- The applicant is proposing ten gray, pole mounted light fixtures around the inside perimeter of the substation. Per the Leawood Development Ordinance, these light fixtures will be a maximum of 18’ in height measured from grade.
- The applicant is proposing an LED downlight to be located on the control enclosure within the electrical substation.

SIGNAGE:
- No signage is proposed with this application.

DEViations GRANTED:
- At the time the Preliminary Plan was approved, the applicant was granted three deviations by the Governing Body on January 2, 2018:
  1. Per the Leawood Development Ordinance Section 16-1-4.1, Public Utilities: General poles, wires, cables and other similar equipment for transmission or distribution to customers of telephone or other communication services, electricity, gas, steam or water, or the collection of sewage or surface water, operated or maintained by a public utility shall be required to be placed underground unless otherwise approved by the Governing Body. The applicant has gained approval from the Governing Body to not underground overhead wires during the preliminary portion of this project.
  2. Per the Leawood Development Ordinance Section 16-2-4.7, Structures Permitted Above Height Limits: no portion of any structure may be erected to a height exceeding 75’ without approval of the Governing Body incorporated in the conditions of the approved development plan. In addition
to the 110' transmission poles (maximum height) in the northeast quadrant of the project and the northwest of the proposed substation, the applicant had gained approval from the Governing Body to allow the 90' transmission deadend, 90' substation deadend, and 90' lighting mast within the electrical substation.

3. Per the Leawood Development Ordinance Section 16-1-4.1, Public Utilities: General, utility structures that otherwise meet the terms and requirements of the Leawood Development Ordinance may be placed in rear and side setbacks when such structures have been reviewed and approved by the Director of Community Development as being in compliance with this ordinance. All new utility facilities, other than replacement structures of equal or lesser size, shall be placed underground otherwise approved by the Governing Body. The applicant has gained approval from the Director of Planning and Development and the Governing Body to have a new 110' transmission pole (maximum height) in the northeast quadrant of the property to be within the required setback, approximately 25' from the east property line. The setback within the AG district is 50' and Section 16-2-4.7 Structures Permitted Above the Height Limits, requires an additional foot for setback for every foot that the structure exceeds the height limit of the district. With the additional setback due to height, the new transmission pole would be required to be setback 125' from all property lines. The Director of Community Development has reviewed and approved this application and is supportive of the transmission pole being within the side yard setback. The addition of this pole allows an existing three pole transmission structure that is 79' in height to be removed. In addition, an alternative alignment to have the 110' transmission pole (maximum height) to meet the 125' setback, will result in additional aboveground structures and a greater quantity of overhead electrical wires.

**STAFF RECOMMENDATION:**

Staff recommends the Planning Commission approve Case 106-18, Indian Creek Substation - request for a Final Plan with the following stipulations:

1. The project is limited to construction of an electrical substation, which is approximately 340' by 200' and contains structures that are up to 90' in height within the substation with structures outside of the substation that are up to 110' in height within the Johnson County Wastewater Treatment Facility.

2. Per the Leawood Development Ordinance, the source of illumination of all proposed light fixtures shall not be visible.

3. Per the Leawood Development Ordinance, all landscaped areas shall be irrigated.

4. All ground mounted utility boxes shall be screened from all public right-of-way with evergreen plantings. Such plantings shall be a minimum of 6" taller than the utility they are to screen.

5. All new utility boxes with a height of less than 55 inches, a footprint of equal to or less than 15 square feet in area, or a pad footprint of equal to or less than 15 square feet, may be installed only with the prior approval of the Director of Community Development as being in compliance with this Ordinance.

6. All new utility boxes with a height of 55 inches or greater, a footprint greater than 15 square feet in area, or a pad footprint greater than 15 square feet in area, shall be authorized only by approval of a special use permit prior to construction.

7. Per the Leawood Development Ordinance, all medium and large deciduous trees (including street trees), shall be 2 ½” caliper as measured 6” above the ground, all small deciduous and ornamental trees shall be a minimum of 1 ½” caliper as measured 6” above the ground, conifers and evergreen trees shall be a minimum of 6’ in height, and shrubs shall be a 24” in height at the time of planting.

8. A letter, signed and sealed by a Kansas registered Landscape Architect, shall be submitted prior to final occupancy that states that all landscaping has been installed per the approved landscape plan and all plant material used is to the highest standards of the nursery industry.
9. All ground mounted light fixtures associated with this project shall be a maximum of 18’ in height.
10. The source of illumination of all proposed light fixtures shall not be visible.
11. The applicant shall obtain all approvals and permits from the Public Works Department, per the public works memo on file with the City of Leawood Department of Community Development, prior to issuance of a building permit.
12. No construction shall be allowed between the hours of 9:00 p.m. to 6:00 a.m., and not on Sundays, May 1st to September 1st. No construction shall be allowed between the hours of 9:00 p.m. and 7:00 a.m., and not on Sundays, the remainder of the year. Construction outside of these times shall meet the noise ordinances and shall require notification to, and approval from, the Director of Community Development on a case by case basis.
13. Development rights under this approval shall vest in accordance with K.S.A. 12-764.
14. In addition to the stipulations listed in this report, the developer/property owner agrees to abide by all ordinances of the City of Leawood including the Leawood Development Ordinance, unless a deviation has been granted, and to execute a statement acknowledging in writing that they agree to stipulations one through fourteen.
MEMORANDUM

Date: September 20, 2018

To: Richard Coleman, Director of Community Development

From: David Ley, P.E., Director of Public Works
Department of Public Works

Re: Indian Creek Substation
Case Number: 106-18

The Department of Public Works has reviewed the aforementioned project and would like to make the following stipulations as part of the Planning Commission Approval:

1) Traffic Impact Analysis:
   a) The applicant was not required to submit a traffic study.

2) Stormwater Study:
   a) The developer’s engineer updated the FEMA floodplain model with the proposed treatment plant and sub-station to verify the improvements will not have an impact to the 100 year water surface elevation. Johnson County is constructing a by-pass channel on the north side of the treatment plant to convey the stormwater around the treatment plant.
   b) Staff hired a consultant review the FEMA floodplain model to verify there are no impacts to the 100 year water surface elevation with the proposed improvement.
   c) The proposed 100 year Water Surface Elevation at the Substation is 843.3. The current 100 year Water Surface Elevation is 843.4. The proposed lowest elevation in the location of equipment in the Substation is 846.5 therefore the equipment will be 3 feet or more above the 100 year Water Surface Elevation.
   d) Johnson County will be required to obtain a No Rise Letter of Map Amendment through FEMA after the grading has been completed for the treatment plant.

3) Construction vehicles, including vehicles of construction personnel, shall not be parked within the Right-of-Way. All staging and storage of equipment and/or materials shall be contained on the proposed development site.
4) All public improvements shall be designed and constructed in accordance with the City of Leawood Public Improvement Construction Standards as developed by the Department of Public Works (latest revision).

5) The developer shall be responsible for repair and restoration of all structures, sidewalk, wiring, sod, etc within the Right-of-Way. This includes existing damage to any of these items.

6) The permit fee for plan review and construction observation shall be five (5) percent of the construction cost for all improvements within the Right-of-Way or Public Easement(s) granted to the City of Leawood. The fee will be charged and collected from the Contractor prior to issuance of the permit from the Department of Public Works.

7) The final Certificate of Occupancy will not be issued until all public improvements have been constructed and accepted by the City Engineer.

If you have any questions, please call me at (913) 663-9131.

GE Evolve™
LED Roadway Lighting
ERL1-ERLH-ERL2

current
powered by GE
GE Evolve™
LED Roadway Lighting
ERL1-ERLH-ERL2

The Evolve LED Roadway Luminaire is optimized for customers requiring a LED solution for local, collector and major roadways. GE's unique reflective optics are designed to optimize application efficiency and minimize glare. The modern design incorporates the heat sink directly into the unit for heat transfer to prolong LED life. This reliable unit has a 100,000 hour design life, significantly reducing maintenance needs and expense over the life of the fixture. This efficient solution lowers energy consumption compared to a traditional HID fixture for additional operating cost savings.

Features:
• Optimized roadway photometric distributions
• Evolve™ light engine consisting of reflective technology designed to optimize application efficiency and minimize glare
• 70 CRI at 2700K, 3000K and 4000K typical.
• −40°C to 50°C UL Ambient Typical.
• ULOR = 0 (zero upright)
• Designed & Assembled in USA

Applications:
• Local Roadways
• Collector Roadways
• Major Roadway/Streets

Compatible with LightGrid™ Outdoor Wireless Control System

ERL1-ERLH-ERL2

Typical Specifications: ERL1-ERLH-ERL2

LED & Optical
- Output Range: 1900 – 30000 lm
- Photometric Options: Type II Narrow, Type II Wide, Type III, Type IV
- System Efficacy: 100 - 145 LPW
- CCT: 2700K, 3000K, 4000K, High brightness LEDs @ 70 CRI

Construction & Finish
- Housing:
  - Die Cast Enclosure
  - Casting-integral heat sink for maximum heat transfer
- Lensing: Impact resistant tempered glass, standard
- Paint: Corrosion resistant polyester powder painted, minimum 2.0 mil thickness.
  - Standard Colors: Dark Bronze, Black, & Gray
  - RAL & custom colors available
  - Optional coastal finish available.
- Weight: 12.4lbs (5.6kg) – 24lbs (10.9kg)

Warranty
- System Warranty: 5 Year Standard, 10 Year Optional

Controls
- Dimming:
  - Standard: 0-10V, Optional: DALI (120-277V Only)
- Sensors:
  - Photo electric sensors (PE) available.
- LightGrid™ compatible

Mounting
- Slipfitter with +/- 5 degree of adjustment for leveling.
- Integral die cast mounting pipe stop.
- Adjustable for 1.5in. or 2 in. mounting pipe.

Suggested HID Replacement Lumen Levels
- ~4,000-5,000 lumens to replace 100W HPS Cobra-head
- ~7,000-8,800 lumens to replace 150W HPS Cobra-head
- ~8,500-11,500 lumens to replace 200W HPS Cobra-head
- ~11,500-14,000 lumens to replace 250W HPS Cobra-head
- ~21,000-30,000 lumens to replace 400W HPS Cobra-head

Note: Actual replacement lumens may vary based upon mounting height, pole spacing, design criteria, etc.

*Contact manufacturer for Load-Time.

**K** option provides single pack box per fixture. Standard packing = 20 units per 560 x 40 x 40 x 60 cm container.

*Recommended for installations within 150 ft. from the coast. Contact Factory for Load-Time.

*Compatible with lightbar 2.0 nodes.

*Not available in 347-480V or 347-480V for Lumen Output Levels 07, 08, 09, and 10.
5 SUMMARY AND CONCLUSION

In summary, a hydraulic analysis has been performed for the final design of the site improvements to the THC WWTF and it has been determined that the project will result in a No-Rise Condition. All the results presented within this report are based upon the final design. The proposed fill within the floodway has been mitigated with the overflow channel. The site has been elevated approximately 2 Ft above the BFE and all structures, electrical equipment, and mechanical equipment will be protected from the 500-year elevation.

A No-Rise Certification and floodplain development permit have been submitted along with this study. Since a no-rise condition is achieved by the proposed improvements, a CLOMR is not required. Upon completion of project construction, a LOMR will be obtained from FEMA to update the current effective floodplain and floodway limits.
City of Leawood Planning Commission Staff Report

MEETING DATE: September 25, 2018
REPORT WRITTEN: September 19, 2018

THE BARSTOW SCHOOL – LEAWOOD CAMPUS – REQUEST FOR APPROVAL OF A PRELIMINARY PLAN AND SPECIAL USE PERMIT – Located north of 123rd Street and west of State Line Road – Case 107-18 **PUBLIC HEARING**

STAFF RECOMMENDATION:
Staff recommends approval of Case 107-18, The Barstow School – request for a Preliminary Plan and Special Use Permit, with the stipulations outlined in the staff report.

APPLICANT:
- The applicant is Ellen Pantaenius with Husch Blackwell LLP.
- The property is owned by Hy-Vee, Inc.
- The engineer is Rachael Reis with Olsson Associates.
- The architect is Shelli Ulmer with Hollis & Miller.
- The landscape architect is Brad Sonner with Olsson Associates.

REQUEST:
- The applicant is requesting approval of a Preliminary Plan and Special Use Permit for a Private Elementary/Middle/High School for Barstow School, located in Leawood Plaza Tract 2, a 4.8 acre tract. The applicant is proposing adaptive reuse of the existing 63,370 sq.ft. supermarket currently owned by Hy-Vee, including minor modifications to the building exterior. Barstow School has the property under contract to purchase.
- The Barstow School is a co-educational school where students in preschool through twelfth grade develop in a challenging educational community. The proposed Leawood campus will be used as an ancillary campus for 50-150 students and 10-15 teachers; students will be shuttled to/from the existing Barstow School located near 115th Terrace and State Line Road. Shuttles will run three to four trips per day.
- The Barstow School is proposing a daycare consisting of two infant rooms, with a maximum of 18 infants, and three toddler rooms, for a maximum of 30 toddlers. The children will be dropped off between 7 a.m. – 7 p.m., with no set time for drop-off and pick-up. Per the Leawood Development Ordinance, a Special Use Permit is required for a daycare. The applicant can apply for a Special Use Permit at the time of Final Development Plan.

ZONING:
- The property is currently zoned SD-NCR (Planned Neighborhood Retail).

COMPREHENSIVE PLAN:
- The Comprehensive Plan designates this property as Retail.
SURROUNDING ZONING:
- North  To the north of the property is additional retail space within Leawood Plaza, and single family residential within the Pembroke Court subdivision, zoned RP-4 (Planning Cluster Residential, under a previous version of the Leawood Development Ordinance).
- East  To the east of the Leawood Plaza development is State Line Road and the City of Kansas City, Mo.
- South  Directly to the south is additional retail space within Leawood Plaza and the single family residential subdivision of Foxborough, zoned RP-1 (Planned Single Family Residential).
- West  To the west of the property is the single family residential subdivision, Pembroke Court, zoned RP-4 under a previous version of the Leawood Development Ordinance.

LOCATION:

SITE PLAN COMMENTS:
- The current tract is 4.82 acres of platted land along the west side of State Line Road and north of 123rd Street. The tract is the centrally located within Leawood Plaza and has frontage on Pembroke Lane, but does not have frontage along State Line Road. The building was the previous location of a Hy-Vee grocery store and is currently vacant.
- The building consists of 63,370 sq.ft The applicant does not propose to change the square footage of the structure or the configuration of the building.
- The applicant does not propose changes to the existing parking lot.
• The building is mainly rectangular in nature with a flat roof. A smaller extension of the building is located north of the primary structure, but is located on another Tract of land and is not proposed to be used as part of the school, and is not part of this application.
• The existing tract consists of a of large parking lot east of the building with access to the front entrance, and a drive aisle on the west side of the building, providing access to an additional 34 parking spaces and the building’s service area.
• Pedestrian access points into the site are from Pembroke Lane and State Line Road. These pedestrian connections exist with the current site and will be maintained with the new school building.
• No playground equipment is proposed with this application.

TRAFFIC:
• A traffic circulation plan was provided, demonstrating the proposed drop-off process for buses and vehicles.
• The site can be accessed directly from the private drive within Leawood Plaza and Pembroke Lane. The applicant proposes that traffic entering from State Line Road will turn onto the private drive and circle the parking lot counter clockwise beginning at the southeast corner of the site. Vehicles entering from the north side of Leawood Plaza will travel south, directly to the front door.
• The applicant submitted a traffic memo to the Public Works Department.

INTERACT:
• An Interact meeting was held on Wednesday, August 29th. A summary of the meeting and sign-in sheet are attached.

PARKING:
• Leawood Plaza utilizes a shared parking agreement between all businesses within the development.
• Section 16-4-5.4(B) of the Leawood Development Ordinance notes parking requirements for a school as 1 per teacher and staff member of the school. The applicant is providing more parking than required for a school use, but will utilize the increased amount of parking for additional needs for events outside regular school hours. Staff is supportive of the parking proposed by the applicant.
• The number of existing and proposed parking spaces within Leawood Plaza are as follows:

<table>
<thead>
<tr>
<th>Building</th>
<th>Existing/Proposed</th>
<th>Tract</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building 1 - Retail</td>
<td>42-54</td>
<td>51</td>

<td>426-548</td>
<td>506</td>
</tr>
</tbody>
</table>

*Note: Building 5 (proposed school) parking is calculated based on school administration needs and exceeds the parking requirements for a school, as stated in the Leawood Development Ordinance. Parking totals include ADA (American’s with Disabilities Act) parking spaces.
ELEVATIONS:
- The existing structure is 23’-2” tall at the building parapet.
- The existing structure consists primarily of red brick with stucco infill along the front colonnade. The applicant proposes to remove the stucco infill and replace it with a storefront window system and three sets of doorways on the south side of the main entrance. The three doorways provide access to/from the day care portion of the building.
- The existing front doors of the building face the north and the south, and are accessed from the front colonnade. The applicant proposes to relocate the main doors to the east side of the building, facing the main parking lot.
- The applicant proposes to remove and replace the worn metal fascia on the front of the building and on the porte-cochere with new metal fascia to match the existing.
- No work will be done to the south and west sides of the building.
- The existing trash enclosure on the west side of the building will remain as existing.

SIGNAGE:
- No signage is proposed with this application. The Leawood Plaza development has approved sign criteria. Signage is approved administratively through a separate application.

LANDSCAPING:
- The site contains existing landscaping, consisting of a combination of deciduous and evergreen shrubs and bushes.
- The west side of the building is currently screened from the adjacent residential neighborhood with a berm accented with evergreen and deciduous trees. The applicant is proposing an additional nine ornamental trees along the existing berm to provide additional screening for the adjacent residential neighborhood.

GOLDEN FACTOR CRITERIA:
The character of the neighborhood:
The area is characterized by an arterial street to the east (State Line Road), a collector street (123rd Street) and adjacent retail development (Leawood Plaza) along with the single family subdivision of Foxborough to the south, Pembroke Lane (collector street) and the single family residential subdivision of Pembroke Court to the west and north. West of Pembroke Court is Leawood Elementary School and Leawood Middle School, part of the Blue Valley School District. East of State Line Road is single family residential within the city of Kansas City, MO.

The zoning and uses of properties nearby:

<table>
<thead>
<tr>
<th>Direction</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>North</td>
<td>To the north of the property is additional retail space within Leawood Plaza, and single family residential within the Pembroke Court subdivision, zoned RP-4 (Planned Cluster Residential) under a previous version of the Leawood Development Ordinance.</td>
</tr>
<tr>
<td>East</td>
<td>The property to the east of State Line Road is located within and under the zoning jurisdiction of the City of Kansas City, Missouri.</td>
</tr>
<tr>
<td>South</td>
<td>Directly to the south is additional retail space within Leawood Plaza and the single family residential subdivision of Foxborough, zoned RP-1 (Planned Single Family Residential).</td>
</tr>
<tr>
<td>West</td>
<td>To the west of the property is the single family residential subdivision, Pembroke Court, zoned RP-4 under a previous version of the Leawood Development Ordinance.</td>
</tr>
</tbody>
</table>
The suitability of the subject property for uses to which it has been restricted:
The site is surrounded by accessible roadways with adequate capacity to accommodate the proposed use. Single family residential subdivisions surround the property on all sides. The zoning of the property ensures compatibility with surrounding neighborhoods. Additionally, a school facility is an approved use within the SD-NCR district with the issuance of a Special Use Permit.

The time for which the property has been vacant:
Leawood Plaza was platted in 1986 and a Hy-Vee grocery store was constructed on Tract 2 of the site in 1987. Hy-Vee occupied the site until 2014. The site has been vacant for four years.

The extent to which removal of the restrictions will detrimentally affect nearby property:
Although the site is suitable for a school, stipulations are necessary to make certain that the project meets City ordinances and to ensure a high quality project that fits with the surrounding uses.

The relative gain to the public health, safety, and welfare due to the denial of the application as compared to the hardship imposed, if any, as a result of denial of the application:
Denial of the application will not result in a relative gain to the public health, safety or welfare; however, a hardship to the applicant and community could be imposed. The school serves the private school educational needs for the surrounding community and provides necessary space to Barstow School, who is outgrowing current facilities. Denial of the application would result in prolonged vacancy of the current property, thereby potentially imposing safety concerns and unsightly conditions on the surrounding community. Denial of the application would also result in longer school commutes and the loss of a potential educational facility within the area.

The recommendation of the permanent staff:
Staff is recommending approval of the case with the stated stipulations.

Conformance of the requested change to the adopted master plan of the City of Leawood:
The proposed application complies with the Comprehensive Plan with a Special Use Permit. The Comprehensive Plan designates this site as Retail Use, which matches the current use of the property. The Leawood Development Ordinance allows for school uses (public or private, elementary, middle or high school) within all districts in Leawood, except for Business Park, with the issuance of a Special Use Permit.

STAFF RECOMMENDATION:
Staff recommends the Planning Commission approve Case 107-18, The Barstow School – request for a Preliminary Plan and Special Use Permit, with the following stipulations:
1. The project is limited to the adaptive reuse of the existing 63,370 sq.ft., 1-story supermarket for use as the Barstow School within the SD-NCR zoning district, on 4.8 acres.
2. A Special Use Permit for a school shall be issued to The Barstow School.
3. At the time of Final Plan for the school, a Special Use Permit shall be required for the daycare use.
4. The term of the Special Use Permit shall be limited to twenty years from the date of Governing Body approval.
5. All new power lines, utility lines, etc. are required to be placed underground. This must be done prior to final occupancy of any building within the project.
6. All new utility boxes with a height of less than 55 inches, a footprint of equal to or less than 15 square feet in area, or a pad footprint of equal to or less than 15 square feet, may be installed only with the prior approval of the Director of Community Development as being in compliance with this Ordinance.

7. All utility boxes, not otherwise approved with the final development plan, with a height of 55 inches or greater, a footprint greater than 15 sq.ft. in area, or a pad footprint greater than 15 sq.ft. in area, shall be installed only with the prior recommendation of the Planning Commission as being in compliance with the Leawood Development Ordinance based on review of a site plan containing such final development plan information as may be required by the City, and approved by the Governing Body. The City may impose conditions on approval, including but not limited to duration or renewal requirements, where the circumstances are sufficiently unusual to warrant the conditions.

8. In accordance with the Leawood Development Ordinance, all trash enclosures shall be screened from public view with a 6 foot solid masonry structure to match the materials used in the buildings and shall be architecturally attached to the individual buildings and accented with appropriate landscaping. The gates of the trash enclosures shall be painted, sight obscuring, decorative steel.

9. Exterior ground-mounted or building-mounted equipment including, but not limited to, mechanical equipment, utilities, meter banks and air conditioning units, shall be painted to blend with the building and screened from public view with landscaping or with an architectural treatment compatible with the building structure.

10. All rooftop equipment shall be screened from the public view with an architectural treatment, which is compatible with the building architecture. The height of the screen shall be at least as tall as the utility being screened.

11. Per the Leawood Development Ordinance, the source of illumination of all proposed light fixtures shall not be visible.

12. The applicant shall obtain all approvals and permits from the Public Works Department, per the public works memo on file with the City of Leawood Department of Community Development, prior to issuance of a building permit.

13. The applicant shall obtain all approvals from the City of Leawood Fire Department, per the Fire Marshal’s memo on file with the City of Leawood Department of Community Development, prior to issuance of a building permit.

14. Per the Leawood Development Ordinance, at the time of Final Plan all pedestrian crosswalks shall be demarcated from the adjacent street pavement.

15. A sign permit from the Department of Community Development shall be obtained prior to installation of any signs.

16. All landscaped areas shall be irrigated.

17. Per the Leawood Development Ordinance, all landscaped areas shall have a minimum of 60% of living material.

18. The size of all plant material shall meet all requirements of the Leawood Development Ordinance.

19. A letter, signed and sealed by a Kansas registered Landscape Architect, shall be submitted prior to final occupancy that states that all landscaping has been installed per the approved landscape plan and all plant material used is to the highest standards of the nursery industry.

20. An erosion control plan for both temporary and permanent measures to be taken during and after construction shall be required at the time of application for building permit.

21. Lighting plans, photometric studies and specific light fixtures that meet the requirements of the Leawood Development Ordinance shall be provided at the time of Final Plan.

22. Materials boards shall be submitted at the time of Final Plan.

23. A cross access/parking easement for the entire development shall be recorded with the Johnson County Registrar of Deeds prior to final certificate of occupancy.
24. No construction shall be allowed between the hours of 9:00 p.m. to 7:00 a.m. and not on Sundays.
25. Special school events or programs shall conclude prior to 11 p.m. Events extending beyond 11 p.m. shall require a Temporary Use Permit.
26. The conditions and stipulations of the preliminary plan approval remain in full force and effect except to the extent expressly modified herein.
27. This Preliminary Plan approval shall lapse in two years, if construction on the project has not begun or if such construction is not being diligently pursued; provided, however, that the developer may request a hearing before the Governing Body to request an extension of this time period. The Governing Body may grant one such extension for a maximum of 12 months for good cause shown by the developer.
28. In addition to the stipulations listed in this report, the developer/property owner agrees to abide by all ordinances of the City of Leawood Development Ordinance, unless a deviation has been granted, and to execute a statement acknowledging in writing that they agree to stipulations one through twenty-eight.
MEMORANDUM

Date: September 20, 2018

To: Richard Coleman, Director of Community Development

From: David Ley, P.E., Director of Public Works

Re: Barstow School
Case Number: 107-18

The Department of Public Works has reviewed the aforementioned project and would like to make the following stipulations as part of the Planning Commission Approval:

1) Traffic Impact Study:
   a) The developer provided a Memo with Trip Generation Comparisons using the previous and proposed land uses. Based on the Study there will be a reduction of 176 trips in the AM Peak Hour and a reduction of 539 in the PM Peak Hour

2) Storm Water Study:
   a) The developer is not making site changes therefore a Storm Water Study is not required.

If you have any questions, please call me at (913) 663-9131.

Copy: Project File
PW Book

PW-1
The Fire Dept. has no objection to this site plan.

*Gene Hunter, Leawood Fire Marshal*
Barstow INTERACT Meeting Summary
8/29/2018 – 6pm
12130 State Line Road
Leawood, KS 66209

Meeting Questions & Answers

- Where will cars/traffic enter?
  - Primarily via State Line Road

- Ownership? Are you buying the whole center?
  - Just the Hy-Vee building itself

- When does work start and when will it be complete?
  - Work will begin upon contract close. Hoping November timeframe. Likely to work in phases. Roof priority, systems, maintenance. Could be complete as early as June 2019 or could go until end of 2019.

- Early childhood drop off – Where & How?
  - Likely via porte cochere in front of building

- (Impact of added greenspace) – What will number of parking spaces be (before, after)?
  - Approximately 30 spaces would be removed.
  - The plan provides for 136 total surface parking stalls, which will be more than adequate for Barstow’s proposed use.

- Is redoing complex parking lot part of a master plan?
  - No, not to our knowledge

- What is the current zoning status?
  - No zoning change requested. We are in the process of seeking approval for a Special Use Permit (SUP) for education use.

- What percent of building will be used for Early Childhood Development?
  - A quarter to a third, but could be a little as 20%.

- Any consideration for Tornado shelters given planned use of more glass?
  - Additional bathrooms will be added and likely to be boxed internal structures that can act as internal high wind shelters.

- How will traffic flow for the early childhood drop off and pick up?
  - Hollis-Miller factoring traffic, timing, projections and logistics [note that traffic flow has been addressed in Barstow’s response to the City of Leawood’s initial response letter].

- What age group is served in early childhood development?
  - 6 weeks to 3-years old, or until they are ready for Preschool.

- Will there be frequent service deliveries (large trucks) on site and how do you plan to address who should and should not be there?
  - Do not anticipate frequent service deliveries.
  - In order to deter unauthorized people from accessing the site, we will have full time, on-site security presence, cameras, etc.

- Will our favorite US Mail drop remain in place?
• Yes, most likely to stay and be accessible via right-of-way.
• Are there plans for any further public entrance off of State Line Road?
  o No.
• Are there plans for a stop light on the north end of the Leawood Plaza?
  o No, not to our knowledge,
• Is JE Dunn doing the construction?
  o Not necessarily. They helped with the initial building inspection. We will likely take construction to bid.
• What are the next steps?
  o City of Leawood Planning Commission Meeting – 9/25/18
  o City Council of Leawood Meeting – 10/15/18
• Is there a time limit on the SUP? How long is it for?
  o Subject to time limit pursuant to the City’s development ordinance.
• Will there be Summer programs and/or programs available to neighbors?
  o Absolutely part of the equation. Similar to Summer @ Barstow programming
• Will there be other shops, businesses, transportation lines as a result of this?
  o Likely to follow, but not aware of anything imminent.
• Will there be a summer Robotics camp?
  o Yes.
• Will there be pedestrian access like a raised crosswalk?
  o Potentially with the greenspace but not necessarily outside the center.
• Are the shopping centers (buildings) to the north and south of former Hy-Vee owned by the same person?
  o Yes.
• What about the truck traffic in the back of the building?
  o There will be some, but not nearly as often as when it was an operating grocery store.
  o Meals likely to be prepared on site as there is a kitchen in place.
• What about evening programs?
  o These will be limited- and would likely end no later than 7:30pm.
• Is the deal with Hy-Vee itself done?
  o It is contingent upon SUP and preliminary Plan approval by the City.
• Has the building been inspected?
  o Completed. We know we need a new roof, however, there are no major structural issues.
• Will there be the opportunity for public comments at the City Meeting?
  o Yes, that is our understanding

Final Discussion
• Clarification was made to distinguish between a SUP and zoning change and it was made clear that we are seeking a SUP and a preliminary development plan.
• Several attendees voiced their enthusiastic support of this project. No attendees were opposed.
• In fact, one attendee suggested a vote amongst attendees. A vote was conducted with unanimous support (in favor) and not a single attendee opposed to the project.
• **Interact Meeting concluded.**

</table>
My husband and I attended the preliminary meeting this evening regarding the Barstow School Expansion. We live in the Foxborough subdivision and feel this would be a wonderful addition to the area. The other local residents in attendance were in overwhelming support, also. We encourage the city council to approve this proposal for a special use permit.

Sincerely,
Donna and Larry Euston

Sent from my iPad
Per your request, this memorandum addresses the redevelopment of a portion of the existing Leawood Plaza located in the northwest quadrant of State Line Road and 123rd Street. The site is currently zoned for 58,946 square feet of retail and a 63,370 square foot supermarket. The retail component of the development is proposed to remain. The supermarket component, which is currently vacant, is proposed to be renovated to a 48-student daycare and a 50-student middle school/high school use. The renovated building will be used by The Barstow School as a day care center for young students and as a secondary learning space for the middle/high school students. Based on information provided by the school, trips to and from the building are expected to be low, around 3-4 busses will transport students over from the main campus and 3-4 staff members will park at the newly renovated building. This memorandum will compare the number of trips generated by the existing and proposed land uses, utilizing data from the Institute of Transportation Engineers (ITE) Trip Generation Manual (10th Edition). The existing retail portion of the development is not proposed to change; thus, it was not included in this trip generation comparison.

Supermarket (LU 850) land use was used to determine the trips generated by the existing building. To determine trips associated with the redevelopment, the Middle School/Junior High School (LU 522) and Day Care Center (LU 565) land uses were chosen due to the similar land use descriptions to the expected use and because the uses offer more conservative trip generation estimates.

Table 1 illustrates the comparison between the existing development and the proposed land uses.

<td>Day Care Center</td>
<td>-</td>
<td>48 Students</td>
</tr>
</tbody>
</table>

Table 2 illustrates the previous and proposed land use trip generation rates for daily, AM, and PM peak hour periods and compares the difference for each.
Based upon the comparisons provided in Table 2, the proposed land uses are expected to generate approximately 6,463 less daily trips during a typical weekday, 176 less AM peak hour trips, and 539 less trips during PM peak hour than the previous land use. The ITE Trip Generation rates for each of the land uses are Attached. The proposed land use is expected to result in an overall decrease in the number of daily and peak hour trips when compared to the existing land use.

We hope that we have provided adequate information for your request. If you have additional questions, please contact us at 913.381.1170.

GENERAL INFORMATION

This stormwater management study is being submitted on behalf of Barstow School for the redevelopment of an existing building into a school at the NW corner of State Line Rd. & W. Santa Fe Trail in Leawood, Kansas. This stormwater report will address the entire Leawood Plaza, however the proposed development only includes the redevelopment of the previous Hy-Vee building and parking lot into a Barstow school.

Project Location and Description

The proposed site lies within Lot 2 of Leawood Plaza plat; the north ½ of Fractional Section 23, Township 13 South, Range 25 East, in Johnson County, Leawood, Kansas and includes approximately 13.62 acres. The site is located at the northwest corner of the intersection of 123rd Street and State Line Rd. and is bounded by Pembroke Ln. to the west and north, State Line Road to the east and 123rd Street to the south. (See Figure 1 in Appendix A for Site Plan). Generally the site is surrounded by residential property.

Study Purpose

The purpose of this study is to explain that the proposed improvements for Barstow School located within Leawood Plaza are in conformance with the City of Leawood Ordinances and Procedures. This document adopts the Standard Specifications and Design Criteria, “Division V – Design Criteria, Section 5600 - Storm Drainage Systems and Facilities” of the American Public Works Association, Kansas City Metropolitan Chapter (APWA) adopted February 16, 2011 and the Mid-America Regional Council, Manual of Best Management Practices For Stormwater Quality October 2012, referred to hereafter as “2012 MARC BMP Manual”. This study will analyze the post-development peak stormwater discharges from the site to ensure there are no adverse impacts on downstream receiving stormwater systems or properties and discuss best management practices to improve storm water quality. The study will also review existing flood plain information.

FEMA Flood Classification

The Barstow School Redevelopment site is located within “Zone X – Area of Minimal Flood Hazard” according to FIRM Map 20091C0070G (see FEMA Firmette, Appendix B).

Soils Descriptions

Soil classifications were obtained from the Natural Resource Conservation Service’s website by utilizing the Web Soil Survey feature. The site soil composition and classification can be viewed in the chart below. These soil properties are not expected to change as a result of development.

A more detailed printout from the online Web Soil Survey is included in Appendix C.

**METHODOLOGY**

**General Criteria and References**

This report was prepared in accordance with the provisions of Leawood development guidelines. The analytical and design criteria used in the study conform to those outlined in the Leawood City Ordinances and the Standard Specifications and Design Criteria, “Division V – Design Criteria, Section 5600 - Storm Drainage Systems and Facilities” of the American Public Works Association; Kansas City Metropolitan Chapter (APWA) adopted February 16, 2011. Based on these criteria, the Preliminary Development Plan and proposed impervious areas from both phases were evaluated using the Rational Method. Rational Method values were weighted based on standard impervious and open space classifications from the 2012 MARC BMP Manual.

Stormwater discharges from the site for the existing and proposed watersheds were evaluated using the Rational Method for the 1, 10, and 100-year storm events. Existing times of concentration were determined using Inlet Time and Travel Time equations found in section 5602.7 of APWA Section 5600. A minimum inlet time of five minutes was used when calculated times were under five minutes. Proposed times of concentration were calculated in the same manner.
HYDROLOGIC/HYDRAULIC ANALYSES

Existing Conditions Analysis

The existing site consists of a building and associated parking lot that generally drains into private storm sewer then flows to the north entering a public storm system located at Pembrooke Ln. & State Line Rd. The existing weighted runoff coefficient for the site is found to be 0.73 using percent impervious area of the existing site. (See Appendix C for Hydrographs). Pre-development flows are summarized in Table 2.

<table>
<thead>
<tr>
<th>Existing Peak Flows</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td>Leawood Plaza</td>
</tr>
</tbody>
</table>

Proposed Conditions Analysis

The proposed site has modifications only associated with the redevelopment for the Barstow School, parcel of land which decreases impervious area. The weighted runoff coefficient value for proposed conditions was found to be 0.69 using percent impervious area of the site with proposed improvements. (See Appendix C for Hydrographs). Post-development flows are summarized in Table 3.

</tbody>
</table>

STORMWATER TREATMENT REQUIREMENTS

BMP Analysis

Per section 4.0 of the 2012 MARC BMP Manual, the property does not meet the definition of a development as stated in APWA 5601.3 and therefore no mitigation is required for this site.
CONCLUSIONS AND RECOMMENDATIONS

The proposed developments will cause no additional stormwater runoff for the project site. Proposed conditions stormwater runoff will be less than the existing conditions, therefore no stormwater mitigation is required for the site.

Based on the information provided herein we request your approval of this storm drainage study for Barstow School at Leawood Plaza. If you have any questions or comments or need additional information, please do not hesitate to contact me at (913) 381-1170

Memo

To: City of Leawood Planning Commission
From: Mark A. Klein, Planning Official
CC: Richard Coleman, Director of Community Development

Date of Meeting: September 25, 2018
Date of Memo: September 19, 2018
Re: Case 97-18, Leawood Development Ordinance Amendment to Section 16-9-26(a)
Automated Bank Teller – Ancillary to Bank or Financial Service. **PUBLIC HEARING**

Case 97-18 proposes to add a definition for “Automated Bank Teller – Ancillary to Bank or Financial Service” to address Automated Bank Tellers that are approved as part of a Final Plan for a bank or financial service, and located on the same lot as those businesses. This definition includes Automated Bank Tellers that are integrated within an exterior wall of a building, or located within a drive-thru. The definition for Automated Bank Teller – Ancillary to Bank or Financial Service is as follows.

**Automated Bank Teller – Ancillary to Bank or Financial Service** – An automated bank teller machine, either free-standing or integrated into a wall of a building, that is ancillary to, and located on the same lot, as the primary use of a Bank or Financial Service.

This application is being proposed in conjunction with Cases 98-18, which proposes to add a definition for an “Automated Bank Teller – Non-Ancillary In-wall” and case 99-18, which will add both of these uses to the Table of Uses.

Currently the Leawood Development Ordinance does not differentiate between Automated Bank Tellers that are approved as part of a Final Plan for a bank or financial service, and Automated Bank Tellers that are remote and not located on property that is the site of a bank or financial institution. It also does not list Automated Bank Teller in Section 16-2-7, Table of Uses, to define, which zoning districts in which they would be allowed.
Memo

To: City of Leawood Planning Commission
From: Mark A. Klein, Planning Official
CC: Richard Coleman, Director of Community Development

Date of Meeting: September 25, 2018
Date of Memo: September 19, 2018
Re: Case 98-18, Leawood Development Ordinance Amendment to Section 16-9-26(b) Automated Bank Teller – Non-ancillary In-wall. **PUBLIC HEARING**

Case 98-18 proposes to add a definition for “Automated Bank Teller – Non-ancillary In-wall” to address Automated Bank Teller Machines that are not approved as part of a bank, or financial institution, and are not located on the same lot as those businesses. The proposed definition is as follows.

**Automated Bank Teller – Non-ancillary In-wall** – A remote automated bank teller machine not located on the same lot as the primary use of a bank of financial institution, which is integrated into the exterior wall of a building. Such machine shall not project more than 3” from an exterior wall, and shall be wholly serviced from within the interior of a building.

This definition includes only Automated Bank Tellers that are integrated into an exterior wall of a building that does not project more than 3” from the exterior façade, and are serviced wholly from within a building. This definition does not include Automated Bank Tellers that does not meet these conditions, including free standing Automated Bank Teller Machines that are located outside.

This application is being proposed in conjunction with Cases 97-18, which proposes to add a definition for an “Automated Bank Teller – Ancillary to Bank or Financial Service” and case 99-18, which will add both of these uses to the Table of Uses.

Currently the Leawood Development Ordinance does not differentiate between Automated Bank Tellers that are approved as part of a Final Plan for a bank or financial service, and Automated Bank Tellers that are remote and not located on property that is the site of a bank or financial institution. It also does not list Automated Bank Teller in Section 16-2-7, Table of Uses, to define, which zoning districts in which they would be allowed.
Case 99-18, adds the two uses discussed with cases 97-18, “Automated Bank Teller – Ancillary to Bank or Financial Service”, and 98-18, “Automated Bank Teller – Non-ancillary In-wall” to the Table of Uses to define where each type of use is permitted.

The amendment proposes to allow “Automated Bank Teller – Ancillary to Bank or Financial Service” in any district that a bank or financial service is permitted, including those with drive-thrus. This is within the SD-O (Planned Office), SD-NCR (Planned Neighborhood Retail), SD-NCR2 (Planned Neighborhood Retail 2), SD-CR (Planned General Retail), and MXD (Mixed Use Development District). These types of Automated Bank Tellers will be approved as part of a Final Plan for a bank or financial institution, on which lot they are located.

The use “Automated Bank Teller – Non-ancillary In-wall” is proposed to be limited to the SD-CR and MXD zoning districts as a Planned Use. Free-standing Automated Bank Tellers that are not part of a bank or financial service, and are not located on the same lot as those businesses is not listed, and therefore is not a permitted use.

This application is being proposed in conjunction with Case 97-18, which proposes to add a definition for an “Automated Bank Teller – Ancillary to Bank or Financial Service” and Case 98-18, which will add a definition for “Automated Bank Teller – Non-ancillary In-wall”.

Currently the Leawood Development Ordinance does not differentiate between Automated Bank Tellers that are approved as part of a Final Plan for a bank or financial service, and Automated Bank Tellers that are remote and not located on property that is the site of a bank or financial institution. The current Leawood Development Ordinance also does not list Automated Bank Teller in Section 16-2-7, Table of Uses, to define, which zoning districts in which they would be allowed.
16-2-7 **TABLE OF USES**

Land Uses and Development. The following Table of Uses establishes the principal uses that are permitted subject to the provisions of this Ordinance, permitted as a planned use under this Article, or permitted as a special use under this Ordinance for each zoning district. Notwithstanding the designation on the Table of Uses, any use required to be permitted as a right in a residential district by applicable federal or state law shall be so permitted.

†Reservoirs, water towers, filter beds or water treatment plants developed pursuant to an interlocal agreement between the applicant and the Governing Body are exempt from the Special Use Permit requirement.

† Subject to requirements of16- 4-12.
The attached Leawood Development Ordinance amendment clarifies Section 16-2-5.3(D) regarding exceptions to the required side yard setback of 15 ft. for additions to legally constructed homes within the R-1 district, which have a setback less than 15 ft. The current Leawood Development Ordinance, which was adopted in 2002, as did the previous Leawood Development Ordinance, provides for exceptions to the 15 ft. side setback if approved by the Board of Zoning Appeals. This exception is in recognition that many homes constructed within Leawood, particularly north of I-435, were built at a time when the required side yard setback was less than 15 ft. within the R-1 zoning district.

Currently the Leawood Development Ordinance allows the Board of Zoning Appeals to grant an exception to the required side yard setback for additions to existing structures, after notice and public hearing, and provided that a determination is made that such exception shall not cause adverse impact on surrounding properties and that the following conditions are met:

a) The existing structure was legally constructed with a side setback of less than 15 feet; and
b) In no case shall the existing structure and any proposed addition be any closer than 10 feet to the property line; and
c) The proposed addition will be continuous and consistent with the existing side build line of the existing structure; and
d) The proposed addition shall not cause further encroachment than that of the existing structure.

As currently written for there to be an Exception rather than a Variance to the side yard within the R-1 district, the proposed addition and existing home must be setback from the side property line by 10 ft. or more, and the addition must be continuous with the existing structure. If either the addition or the existing house has a side yard setback of less than a 10 ft., a Variance is needed.

Many legally constructed homes within the City of Leawood have a side yard setback that is less than 10 ft., and the Board of Zoning Appeals often gets applications for variances to the side yard setback for additions to these homes. This Leawood Development Ordinance amendment proposes allow the Board of Zoning
Appeals to grant side yard exceptions for additions to legally constructed homes that are setback less than 10 ft., provided that the addition does not extend beyond the existing side build line of the existing home. It also removes the requirement from the exception that the addition must be continuous with the existing structure.

In addition, the amendment proposes two other clarifications:

a) It removes a reference to the definition of rebuild as contained in Subsection E, because Subsection E does not contain a definition of rebuild. A definition of “rebuild” is already provided within Section 16-2-5.3(D), which is the same section that is being amended with this application.

b) It adds a reference to an existing figure (Figure B), which illustrates “midpoints” referenced in this section.
16-2-5.3 R-1 (Planned Single Family Low Density Residential District) (15,000 Sq. Feet Per Dwelling)

A) General Purpose and Description: Property zoned and developed as R-1 Planned Single Family Residential shall provide for single family detached dwellings and other selected uses which are compatible with the low density residential character of this district while preserving the character of the existing neighborhoods within the district, each having their own characteristic lot size and residential architecture. Redevelopment in this District shall be subject to such additional regulations as may be necessary to preserve the unique character of the specific neighborhood. Property zoned R-1 should be those tracts that correspond to the low density land use category identified in the Comprehensive Plan.

B) Principal Permitted, Planned and Special Uses: Only the uses specified as authorized in “R-1” in the Table of Uses 16-2-7 are permitted principal uses in the R-1 District. All uses and any erection, construction, relocation, or alteration of any structure or building are subject to the requirements of this District and shall further be subject to all other requirements of this Ordinance except as may be expressly exempted.

C) Accessory Uses: Accessory Uses in this district are governed by 16-4-1 of this Ordnance.

D) Bulk Regulations:

For purposes of this Section of this Ordinance, the following terms shall have the meanings as set forth below:

Average Single-Family Floor Area Ratio – 0.23
Base Lot Area – 15,000 sq. ft.
Base Lot Depth – The base lot depth is calculated by dividing the minimum lot area required per the bulk regulations below by the minimum lot width required per the bulk regulations below. In an R-1 district, this calculation is 15,000/100=150.
Garage Allowance - 450 sq.ft.
Lot Depth - The lot depth is the measurement from the front property line to the rear property line. For non-rectangular lots, lot depth will be calculated by measuring the distance from the midpoint of the front lot line to both the point on the rear lot line that is closest and that which is the farthest away. The average of these two measurements will then be taken to determine the lot depth.
Lot Width - The horizontal distance between the side property lines measured at the required front yard setback line.
New – A dwelling that is constructed on a lot upon which a dwelling has never existed.
Rebuild – A dwelling that is constructed on a lot upon which a dwelling has previously existed.
Remodel – Any improvement to the exterior or interior of a dwelling that requires a building permit, including construction that increases the size of a dwelling in terms of height, length, width or total floor area.
Single Story Dwelling – A dwelling which has no habitable living space above the floor on which the main entrance is located.
Square Footage – The livable area of a dwelling excluding any basement area.
Two-Story Dwelling – A dwelling wherein there is a habitable living space above the floor on which the main entrance is located.
<table>
<thead>
<tr>
<th>Requirement</th>
<th>Minimum Distance/Area</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Front Setback:</strong></td>
<td>35 feet, unless the setback regulations in Section 16-2-4.5 apply. In addition, no rebuild—as defined in Subsection E below—shall be permitted to have a front setback greater than the average of the midpoints (50% of the depth) of the adjacent homes facing the same street on either side of the subject property. Midpoints will be calculated by determining the distance from the front property line to the midpoint of the dwelling along the side directly adjacent to the subject lot. See Figure B below. In addition, the Board of Zoning Appeals shall have the power to grant an exception to the required Front Setback for the addition of a non-enclosed front entryway to an existing structure, after notice and public hearing as provided for in Section 16-5-3, and upon a determination that such exception shall not cause adverse impact on surrounding properties and that the following conditions are met:</td>
</tr>
</tbody>
</table>
|                           | a) The existing structure was legally constructed and the structure meets the required front yard setback; and  
b) The proposed entryway addition is no larger than 75 sq. ft., and protrudes into the required setback by no more than 6 feet; and  
c) The proposed entryway addition will be architecturally attached to and be constructed of the same materials as the primary residence; and  
d) The exception is necessary to allow for the entryway improvement to be made. |
| **Side Setback:**         | 15 feet; except that the Board of Zoning Appeals shall have the power to grant an exception to the required Side Setback for additions to existing structures, after notice and public hearing as provided for in Section 16-5-3, and upon a determination that such exception shall not cause adverse impact on surrounding properties and that the following conditions are met: |
|                           | a) The existing structure was legally constructed with a Side Setback of less than 15 feet; and  
b) In no case shall the existing structure and any proposed addition be any closer than 10 feet to the property line; and  
c) The proposed addition will be continuous and consistent with the existing side build line of the existing structure; and  
d) The proposed addition shall not cause further encroachment than that of the existing structure. |
<p>| <strong>Corner Lot Side Setback:</strong> | 30 feet |
| <strong>Rear Setback:</strong>         | For lots that have a depth of 150 feet or less, 30 feet. For lots that have a depth of more than 150 feet, the rear yard setback shall be calculated using the following formula: 70% x (Lot depth-150) + 30. If the dwelling has a front setback greater than the front setback required for the lot, the rear setback shall be adjusted to the required front setback. |</p>
<table>
<thead>
<tr>
<th>Requirement</th>
<th>Minimum Distance/Area</th>
</tr>
</thead>
<tbody>
<tr>
<td>per these bulk regulation or the requirement</td>
<td>per these bulk regulation or the requirement contained in Section 16-2-4.5 of this Ordinance, then the rear setback shall be reduced by an amount equal to the difference between the actual front setback and the required minimum front setback; provided in no circumstance shall the rear setback be less than 30 feet.</td>
</tr>
<tr>
<td>Irregular Lot Rear Setbacks:</td>
<td>On lots, with an irregular rear property line, with a primary structure placed at approximately a 45 degree angle toward the street or lots of other than generally rectangular shape, the rear yard setback shall have an average distance of 30 feet. This setback shall be determined by extending the sidewalls of the structure to the rear property line and calculating the square footage within the area between the rear walls, the side extensions and the rear property line(s). This figure will then be divided by the distance between the extended sidewalk lines. This will give the average depth of the area enclosed and this must be equal to or greater than 30 feet. In no case shall the structure be located less than 15 feet from any property line.</td>
</tr>
<tr>
<td>Lot Area; existing lots:</td>
<td>15,000 square feet per dwelling</td>
</tr>
<tr>
<td>Lot Area; new lots:*</td>
<td>The greater of 15,000 sq. ft. or the average (up to a maximum of 1 acre) of all lot sizes within 300 feet of any lot line. For the purposes of this calculation, only lots within the municipal boundary of the City of Leawood shall be included.</td>
</tr>
<tr>
<td>Lot Frontage:</td>
<td>100 feet</td>
</tr>
<tr>
<td>Minimum Lot Width:</td>
<td>100 feet as measured at the front setback</td>
</tr>
<tr>
<td>Height Limit:</td>
<td>35 feet as measured at grade at the front door, unless one of the restrictions or exceptions outlined in Subsection E below should apply.</td>
</tr>
<tr>
<td>Maximum Square Footage</td>
<td>The maximum square footage allowed for any single family residential structure shall be determined by the following formula: $(.23 \times \text{Base Lot Area} \times (\text{Lot Width/Minimum Lot Width}) \times (\text{Lot Depth/Base Lot Depth})) + \text{Garage Allowance}$</td>
</tr>
<tr>
<td>Open Space</td>
<td>30% of lot area</td>
</tr>
</tbody>
</table>

* Lots created after the effective date of this Ordinance.

E) Restrictions on Height. The maximum height of a dwelling shall be further limited as follows:

1) Additional Restrictions.

   a. Rebuilt or Remodeled Dwellings other than those situated between two Two-Story Dwellings: The maximum height of the exterior wall at the side-yard setback shall not exceed 23 feet in height as measured from the front door elevation; provided, that for each additional foot of setback, one additional foot of height may be added up to thirty
feet. Provided, that the total height of the dwelling shall not exceed 30 feet as measured at grade at the front door.

b. Rebuilt or Remodeled Dwellings situated between Two Story Dwellings: If the Rebuilt or Remodeled dwelling has two story dwellings on either side, then the maximum height of the exterior wall adjacent at the side-yard setback shall not exceed 23 feet in height as measured from the front door elevation; provided, that for each additional foot of setback, one additional foot of height may be added, provided, the subject dwelling shall not be greater than the taller of the two adjacent dwellings. If one of the adjacent dwelling received an adjustment in height as provided in Subsection F below, then such adjustment shall be subtracted from the height of the adjacent dwelling for purposes of determining the allowed height for the subject dwelling.

c. If the Rebuilt or Remodeled dwelling is situated on a corner lot, then the above guidelines shall apply using the dwellings on the two nearest abutting lots on either side of the subject dwelling to determine the height limit. See Figure A below.

2) Rebuilt or Remodeled Dwelling Height Limit Modified. In all cases, however, a rebuilt or remodeled dwelling may be built to the dimensions of the previous dwelling existing prior to the demolition or destruction. In addition, an increase in height may be granted at a rate of 1 foot for every 1 foot in side yard setback provided above the minimum side yard setback required, up to a maximum of 3 feet.

F) Board of Zoning Appeals Authorized to Grant Exceptions. The Board of Zoning Appeals shall have the power to grant an exception to the above stated height and bulk restrictions for, rebuilt or remodeled dwellings, after notice and public hearing as provided for in Section 16-5-3, and upon a determination that such exception shall not cause adverse impact on surrounding properties, and that the following conditions are met:

1) Exception for Height Limit:
   a. The additional height allowed shall not be more than 2 feet for a maximum height of 37 feet for instances where the 35 foot height limit applies and 32 feet for instances where the 30 foot height limit applies; and
   b. The dwelling has not already received the height increase allowed in Subsection E above for additional side yard setback provided; and
   c. The grade of the subject lot is such that applying the height limit restrictions contained in Subsection E above would cause a hardship on the applicant in light of the proposed design of the applicant’s dwelling and the design of the neighboring dwellings; and
   d. The proposed height of the, rebuilt or remodeled dwelling shall reflect the character of the other surrounding dwellings in the neighborhood.

2) Exception for Maximum Square Footage:
   a. The additional square footage allowed shall not be more than 20 percent of the maximum square footage allowed pursuant to this Ordinance; and
   b. The proposed size of the rebuilt or remodeled dwelling shall reflect the character of the other surrounding dwellings in the neighborhood.

G) Grade Change. The natural grade of the lot on which the, rebuilt or remodeled dwelling is to be placed shall not be vertically altered by more than 1 foot, unless the alteration is to provide
compliance with storm and waste water regulations or guidelines. Provided, such alteration to the natural grade of the lot of more than 1 foot shall not exceed the most stringent grading standard that will provide compliance with the City’s storm and waste water regulations, and any such alteration shall first be approved in writing by the City Engineer.

H) Sewage Disposal: Connection to a sanitary sewer system is required.
