What Can One Person Do?

✓ at home

✓ at school

✓ at work

✓ at our place of
worship

Answer: A Lot!

"Use it up, wear it out, make it do or do without."

- New England Proverb

Here's What One Person Can Do

Hello All,

Thank you for your dedication to a beautiful city! **I am trying to find a community garden plot area for a garden.** I noticed that most of the cities in the area do have this type of program, except for Leawood? I am on waiting lists for other cities but the likelihood is slim to none as these programs are very popular and plots are coveted by the city resident. **I am interested in helping to make this available in Leawood.** Please contact me if you think this option would be of interest in Leawood.

Best,
Kayla Bruce

Shout Out to Kayla Bruce!

Community Garden Plots

96th and Lee Blvd.

- A few Slots (of 32) are still available.
- Temporary location.
- Plots are \$25 each for Leawood residents and \$40 each for non-residents.
- Application are available on-line or see Dustin tonight.
- Or win one in the Raffle!

Recycling

RECIRCULATION WEEKEND CITYWIDE

JUNE 4 & 5 AND SEPT 17 & 18, 2016

**ANYTHING GOES!
LET IT GO. GIVE NEW LIFE. RECIRCULATE**

You may set out items Saturday morning starting at 7 am.

People can pick-up any **curbside items** they want (*please do not take items from midway/upper driveway portion - if you are unsure, ask the homeowner*).

Unpicked or leftover items must be removed by Monday morning by the homeowner. There will be no pick-up by the city.

The City of Leawood is not responsible for lost, misplaced, or stolen items taken from your property.

LET'S RECYCLE LEAWOOD!

The cities of Overland Park, Leawood, and Prairie Village are conducting a
Recycling Extravaganza

Please visit the
Overland Park website
<http://opkansas.org>
for more information
or contact

Jim Twigg at 913.895.6273

or via email:
jim.twigg@opkansas.org

Saturday • April 23, 2016 • 8:00 am - 2:00 pm

JCCC • 12345 College Blvd. • Overland Park, KS 66210

Confidential documents will be destroyed onsite by ProShred Security and you can watch.
The suggested donation for this service is \$5 for a standard file box and \$10 for larger quantities.

A charge of \$10 for each tube type TV or CRT monitor. For 10 or more computers,
contact Surplus Exchange at 816.472.0444 to schedule a pickup at your location.

Surplus Exchange

- computers, radios, stereos, CD players, small electronics, flat panel TVs and monitors, printers and cell phones, misc. electronic parts, etc. (no charge)
- projection type TVs, CRT monitors and TVs (\$10 each)

ProShred Security

- confidential papers for shredding
- paper clips and staples are OK - no loose leaf binders
- donations accepted

Heartland Habitat for Humanity ReStore

- new and usable building materials, hardware, fixtures, appliances

Fabric Recycles

- unused fabric and notions
- unusual lengths, sizes of fabric and trims, notions, machines

Sleepyhead Beds

- twin, full, and queen size, box springs and bedding (gently used, reusable items will be thoroughly sanitized and free of charge to a limit in number and no flammable items will be accepted)

RevolveKC

- bicycles and bike accessories (e.g. helmet, locks and tools) and gear
- no women's clothing or clothing

Greater Kansas City Community Gardens

- shovels, spades, garden forks, cultivators, garden hoses, rakes (no leaf rakes), garden hand tools, any strange misc. garden tool, wheel barrows, watering wands, and water heads
- **no chemicals or hoses**

Shoe Kansas City

- gently used shoes of all kinds

Coalition for Independence

- durable medical equipment (wheelchairs, walkers, crutches, canes, shower chairs, etc.)
- eyeglasses, sunglasses, hearing aids
- up to 10 fluorescent bulbs per vehicle will be collected by Overland Park's bulk waste service

Miscellaneous

- durable medical equipment (wheelchairs, walkers, crutches, canes, shower chairs, etc.)
- eyeglasses, sunglasses, hearing aids
- up to 10 fluorescent bulbs per vehicle will be collected by Overland Park's bulk waste service

Unleashed Pet Rescue

- crates and kennels, blankets, sheets, towels, dog collars & leashes, bags of dry dog food, canned dog & cat food, scoopable cat litter

Goodwill Industries

- clothing, housewares, small appliances, furniture, toys, and many other items

Rehabilitation Institute

- books (hardcover and soft), magazines, and newspapers

**April 23rd at JCCC and
Fall TBD at Black and Veatch
Vendors subject to change**

Where Has All The Water Gone?

Catherine C. Lavis, Ph.D.

Associate Professor & Extension Specialist
Landscape Management
Kansas State University

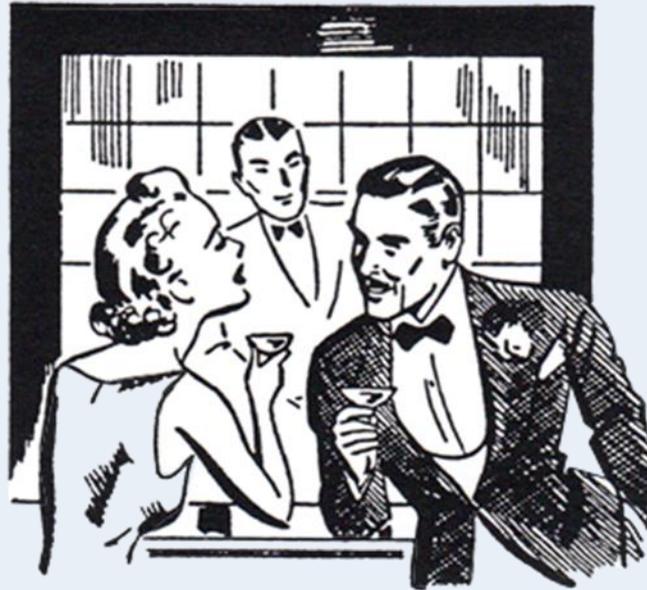

clavis@ksu.edu

**In the US,
we take
our water
for granted.**

Is there *really* a water shortage?

Water crisis?!
Oh, I thought you said wine crisis.
I nearly panicked.

Sadly, many people do have this attitude.

Is there cause for concern?

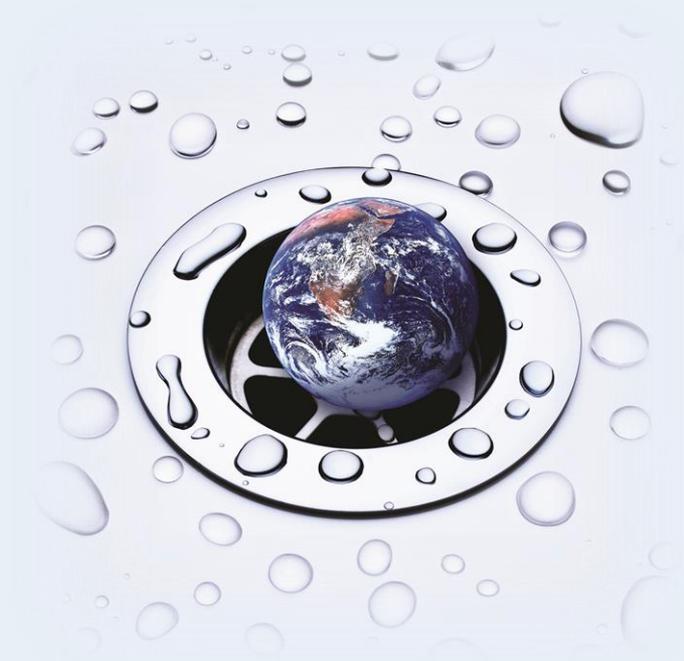

You decide.

Question

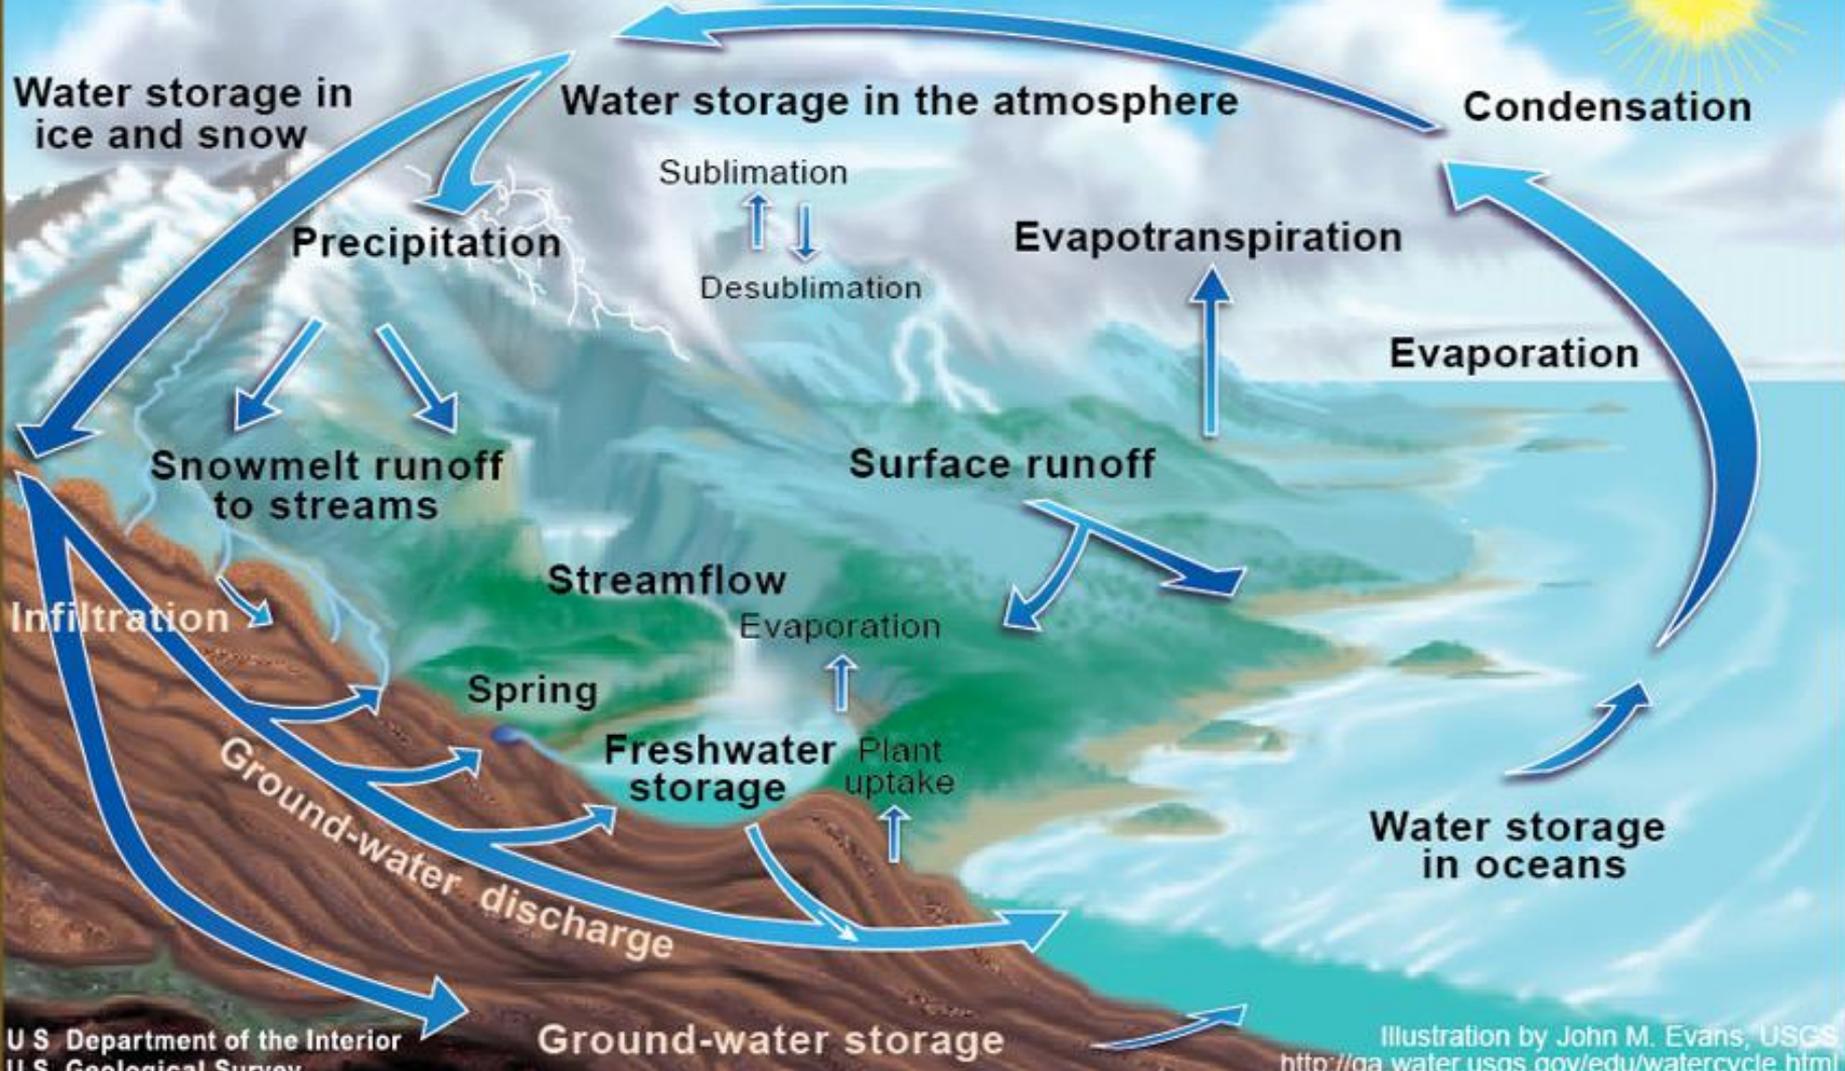

If your neighbor had water and you did not, would you fight for it?
Would you go to war for it?

Lots of people – from multi-degreed behavioral psychologists to bar-room philosophers – **believe you would.**

Where Does Water Come From?

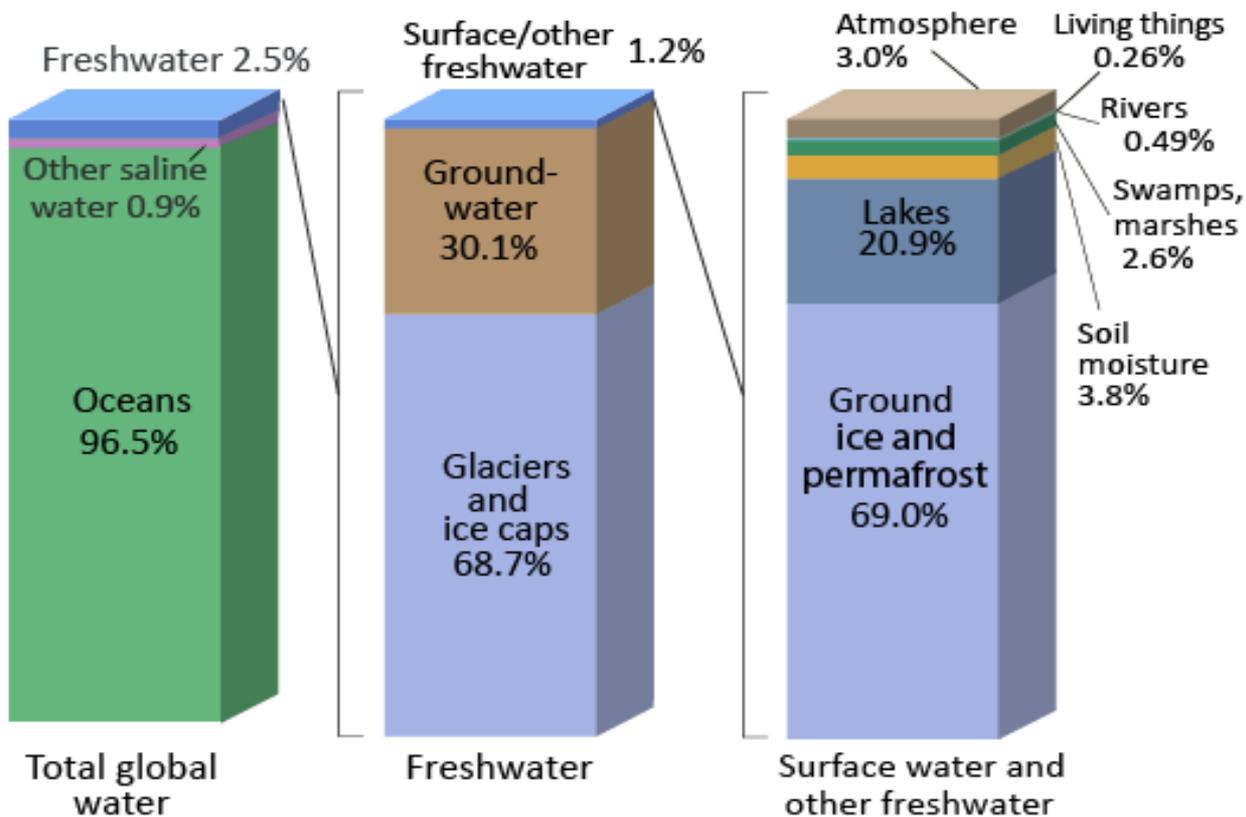

The Water Cycle

Only 3% is available for human consumption

Where is Earth's Water?

Source: Igor Shiklomanov's chapter "World fresh water resources" in Peter H. Gleick (editor), 1993, *Water in Crisis: A Guide to the World's Fresh Water Resources*.

NOTE: Numbers are rounded, so percent summations may not add to 100.

Our Water Use

Guess what country uses the most fresh water?

The United States

- 3.9 trillion gals consumed in the United States per month.
- Nearly 8 billions gals for outdoor use.
- Avg. American family uses 176 gals/day vs. an African family that uses 5 gals/day.
(www.water.org)

Not Just California or the West

Other threatened regions include:

Midwest

Where the Great Lakes are shrinking.

Upstate New York

Where reservoir levels have fallen to record lows.

Georgia

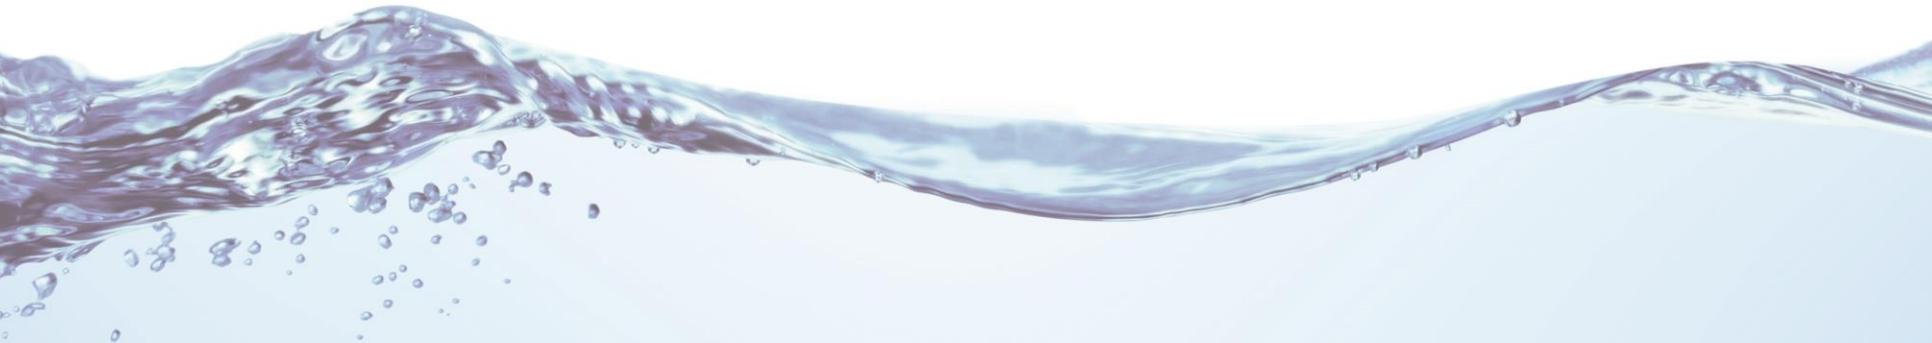

In crisis now.

Florida

Crisis is expected soon.

States Facing Water Shortages

- At least **36 states** expected to face water shortages within the **next five years**, according to U.S. government estimates.
- Available freshwater **supplies dwindling** across the country due to rising temperatures and droughts, while increasing sprawl, population and inefficient resource usage are leading to **rising demand**.

Kansas Climate Summary

January 2015

Over 80% in some form of drought, 2% extreme.

December 2015

That switched to almost 98% drought-free.

2015 Ranked as the Wettest since 1895!

Such data tends to relax concerns.

How We Waste Our Water

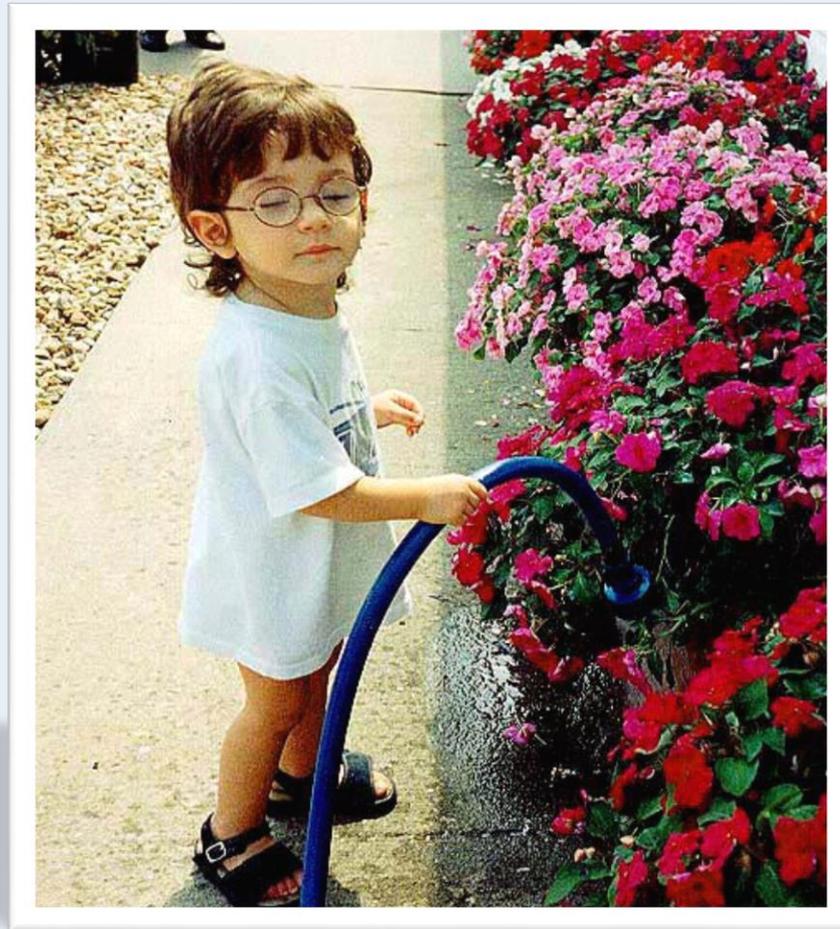

Indoor Water Use

- A full bath tub: 36 gals on average
- Old shower: 5 gal/min
- Water-saving showers: 2 gal/min
- Brushing teeth: < 1 gal/min - turn off water!
- Washing hands/face: 1 gal - turn off water!
- Dishwasher: 6-16 gals depending on age
- Dishwashing by hand: 8-27 gals
- Clothes washing: 25-40 gal/load
- Toilet, new style: 1.6 gal

Outdoor Watering

Uses about 2 gal/minute!

Ways to Save Water

- Irrigate ornamental landscape areas or turf areas no more than twice a week.
- Wait at least 48 hours after rainfall to irrigate ornamental landscape or turf areas.
- Irrigate between 7 p.m. and 9 a.m.
- Use a hose with a shutoff nozzle.
- Grab a broom and avoid hosing down hard-surfaced areas such as sidewalks, driveways and parking lots.

More Ways to Save Water

- Fine-tune your irrigation system to avoid water to ponding and/or creating run-off.
- Fine-tune your irrigation system to ensure there is no excess water runoff flowing onto the public right of way.
- Use only recirculating decorative water fountains.

AUG 3 2004

CHEVROLET

Water Availability & Quality and Sprinkler Irrigation

Up to 60% of Residential Water Goes to the Landscape

- Automatic sprinkler systems can and do use more water than most plants require.
- Water can be saved when the system is properly maintained and scheduled.
- Older systems need to be updated.

Steps in the Right Direction May Become Law

- Limiting the number of days the system runs.
- Reducing the size of the landscape watered.
- Decreasing or prohibiting “water-in” chemicals.
- Requiring use of particular plant materials.
- Promoting native landscape plants.
- Check out the K-State Gardens.

<https://www.k-state.edu/gardens/>

What Can Local Municipalities Do?

Requirements for:

- irrigation certification
- rain sensors/moisture sensors
- design overview before installing irrigation
- older system updates
- native plants or groundcover vs. turf
- usage based billing (charge more for water)

Fines for:

- blowing clippings, fertilizer into streets
- failing to keep curb tidy
- waste

What Else is New?

Planning for Our Future Tomahawk Creek Wastewater Treatment Facility

What is the goal of this project?

Johnson County Wastewater is determining what improvements are needed at the Tomahawk Creek Wastewater Treatment Facility. The project will determine how to meet future regulations in the most cost-effective way.

The goals of the project are to:

1. Determine how to meet new water quality regulations requiring upgrades to the existing treatment facility.
2. Confirm the previous study recommendation to expand the Tomahawk Creek Wastewater Facility and discontinue sending flow to Kansas City, Missouri.

What is driving this change?

Treatment costs will increase for Johnson County Wastewater customers due to two factors:

1. New water quality regulations require upgrades to the existing Tomahawk Creek facility to improve water quality in Indian Creek and downstream waters.
2. The cost to continue sending flow and paying Kansas City, Missouri for treatment will substantially increase because of Kansas City's \$4.5 billion planned infrastructure improvements over the next several decades.

A previous study identified \$280 million of investment to expand the Tomahawk Creek Facility to treat all flow as the most cost-effective long-term solution.

Tomahawk Creek Wastewater Treatment Facility

10701 Lee Boulevard, Leawood, Kansas

- The facility was originally built in 1955.
- The facility currently treats approximately 7 million gallons of wastewater each day.
- 40 percent of the wastewater from parts of Leawood, Olathe, Overland Park, and Prairie Village is treated at the current facility.
- 60 percent of the wastewater is currently sent to Kansas City, Missouri for treatment.
- Treated water flows into Indian Creek between Lee Boulevard and College Boulevard.

Johnson County Tomahawk Creek Wastewater Treatment Plant Expansion
