Notes:

1.

1. Area of influence is equal to the area of the cut plus 2.5 feet on each side (expressed in square yards).
2. Depreciation rates are based on a 40-year designing standard. Depreciation for the first 5 years is 1% per year, followed by a straight-line depreciation less 15% for the remaining street design standard (35 years). Depreciation can occur at 1% per year after this time for up to 15 years or street reconstruction, whichever comes first. This reflects the consensus of the Committee that streets retain some value beyond their design standards or expected street life.
3. Cost estimates are based on historical data maintained by Leawood's Department of Public Works.
